

Table of Contents

1. Geometry	1
Introduction	1
1.1 Euclid's Geometry	2
1.1.1 Definitions, Axioms and Postulates	2
1.1.2 Statements, Theorems and Proofs	7
1.1.3 Similar version for the Fifth Postulate of Euclid	9
1.2 Lines and Angles	12
1.2.1 Important terms and basic definitions	12
1.2.2 Angles and its types	12
1.2.3 Intersecting and non-intersecting lines	17
1.2.4 Pairs of Angles	17
1.3 Properties of Lines and Angles	25
1.3.1 Parallel lines and the Transversal	25

1.3.2	Lines parallel to the identical line	29
1.3.3	Angle Sum Property of the Triangle	34
1.4	Triangles	43
1.4.1	Congruence of the Triangles	43
1.4.2	Criteria for the congruence of Triangles	44
1.5	Some properties of the Triangles	54
1.5.1	More criteria for the Congruence of the triangles	58
1.6	Quadrilaterals	65
1.6.1	Angle sum property for the Quadrilaterals	65
1.6.2	Types of Quadrilaterals	66
1.6.3	Properties of the Parallelogram	68
1.6.4	Mid-point Theorem	77
	References	80

2. Mensuration 81

2.1	Introduction	81
2.1.1	Polygon	82
2.2	Quadrilaterals	92
2.2.1	Rectangle	92
2.2.2	Square	95
2.2.3	Rhombus	96
2.2.4	Parallelogram	98
2.2.5	Trapezium	99
2.2.6	Kite	100
2.2.7	The Family Tree chart	101
2.3	Circle	103
2.3.1	Semicircle	105
2.3.2	Sector	108
2.3.3	Arc length	110
2.4	3 D Mensuration	112
2.4.1	Cube	112
2.4.2	Cuboid	114
2.4.3	Cylinder	115
2.4.4	Hollow cylinder	117
2.4.5	Cone	120
2.4.5	Sphere	122
2.4.6	Hemisphere	124
2.4.7	Prism	128
2.4.8	Pyramid	130
	References	135

3. Trigonometric Functions	136
3.1 Introduction to Trigonometric Functions	136
3.1.1 Definition	136
3.1.2 Radian and Degree Measure	138
3.2 Trigonometric Identities	143
3.2.1 Trigonometric Function Values	147
3.2.2 Trigonometric Equations	151
3.3 Graphing of Trigonometric Functions	153
Graphing of trigonometric functions	153
3.3.1 Limits of Trigonometric Functions	159
3.4 Derivatives of Trigonometric Function	161
3.5 Inverse Trigonometric Functions	167
3.6 Inverse Trigonometric Identities	177
3.7 Practical Applications of Trigonometry	189
Calculating Heights and Distance	189
Calculating Peripheral Vision	192
References	204
4. Probability and Statistics	205
4.1 Mathematical Treatment	206
4.1.1 Experiments, Outcome, Sample Space and Events	206
4.1.2 Operations on Events	207
4.2 Assignment of Probabilities	210
4.3 Calculation of the Probabilities of Events	220
4.3.1 Experiments with Equally possible outcomes	220
4.3.2 Complement Rule	222
4.4 Conditional and Independent Probabilities	225
4.4.1 Conditional Probability	225
4.4.2 Independent Events	227
4.5 Tree Diagrams	230
4.6 Bayes' Theorem	236
4.6.1 Bayes' Theorem for 2 events	237
4.6.2 Bayes' Theorem for 3 events	237
4.6.3 Bayes' Theorem for n events	237
4.7 Visual Representations of Data	241
4.7.1 Bar Chart	241

4.7.2	Pie Chart	242
4.7.3	Median, Quartiles, range and Interquartile range	244
4.8	Frequency and Probability Distributions	247
4.8.1	Probability Distributions	251
4.8.2	Binomial Trials	255
4.9	Mean, Variance and Standard deviation	258
4.9.1	Mean	258
4.9.2	Expected Value	261
4.9.3	Variance	263
4.9.4	Standard Deviation	265
4.9.5	Variance and Standard Deviation of a Binomial Random Variable	266
	References	269

5. Quadratic Equations and Complex Numbers 270

5.1	Introduction to Quadratic equations	270
5.1.1	Graphic connection of quadratic equation	271
5.1.2	Roots of quadratic equation	272
5.2	Symmetric functions	275
5.2.1	Relation between the roots and the coefficients of the quadratic equation	275
5.2.2	Properties of roots of a quadratic equation	278
5.3	Factorized form of the Quadratic equation	281
5.3.1	Factorization by using sum-product pattern	281
5.3.2	Factorization by using FOIL method	285
5.3.3	Factorization by grouping	289
5.3.4	Factor by special products	290
5.4	Solution of Quadratic equation by using factorized form	294
5.5	Complex Number	299
	Introduction	299
5.5.1	Addition and subtraction of complex numbers	300
5.5.2	Multiplication of complex numbers	303
5.5.3	Division of complex number	306
5.5.4	Some important identities	307
5.5.5	Modulus of complex number	309
5.6	Complex Number on Plane	311

5.6.1	Argand plane	311
5.6.2	Polar plane	313
5.6.3	Euler form	317
	References	319
6.	Three-Dimensional Geometry	320
	Introduction	320
	Application in Real Life	321
6.1	Direction Cosines and Direction Ratios of a Line	321
6.1.1	Direction Cosines of a line passing through two points	323
6.2	Equation of a Line in Space	327
6.2.1	Equation of a line passing through a given point and parallel to a given vector \mathbf{b} .	328
6.2.2	Angle between Two lines	330
6.2.3	Method to determine the equation of lines when the angle between them is known	331
6.3	Finding the shortest distance between two lines	335
6.3.1	Method for finding shortest distance between two parallel lines	340
6.4	Plane	344
6.4.1	Normal Form of the equation of a plane	345
6.5	Determining the equation of a plane which passes through a given point and is perpendicular to some given vector	349
6.6	Determining the equation of a plane which passes through three non collinear points	353
6.6.1	Intercept form of the equation of a plane	356
6.7	Equation of a plane passing through the intersection of two planes	359
6.8	Coplanarity of Two Lines	364
6.8.1	Determining Angle between Two Planes	368
6.9	Distance of a point from the plane	372
6.9.1	Determining the Angle between the Line and a Plane	375
	References	378
	Index	379
