

Table of Contents

1. Equations and Inequalities	1
1.1 Linear Equation in One Variable	1
1.1.1 Definition	1
1.1.2 Solving Linear Equation in one Variable	1
1.2 Quadratic Equations in One Variable	5
1.2.1 Definition	5
1.2.2 Solving Quadratic Equations in one Variable	6
1.3 Applications of Linear and Quadratic Equations in one Variable	10
1.3.1 Introduction	10
1.4 Dealing with Inequalities	14
1.4.1 Linear Inequalities in one variable	14
1.4.2 Properties of Inequalities	14
1.4.3 Compound Inequalities	16
1.4.3 Absolute-value Inequalities	17

1.5	Linear Equations in Two Variables	20
1.5.1	Definition	20
1.5.2	Solving Linear equation in two Variables	21
1.5.3	System of Linear Equation in two Variables	21
1.5.4	Solution of a System of Linear Equations	27
1.6	Linear Equations in Three Variables	34
1.6.1	Definition	34
1.6.2	Solution of a linear equation in three variables	34
1.6.3	System of Linear Equations in 3 Variables	34
1.6.4	Solution of System of Linear Equations in three Variables	36
1.7	Applications of System of Linear Equations in Two and Three Variables	47
1.7.1	Introduction	47
1.8	System of Non-Linear Equations in two Variables	54
1.8.1	Introduction	54
1.8.2	Solution of Non- Linear Equations	55
1.9	Inequalities in Two Variables	62
1.9.1	Introduction	62
1.9.2	Solution of Linear Inequality in Two Variables	63
1.9.3	System of Linear Inequalities in Two Variables	65
	References	71

2. Polynomial and Rational Functions 72

2.1	Introduction to Polynomials	72
2.1.1	Definition	72
2.1.2	Properties of Polynomials	74
2.1.3	Degree of Polynomial	74
2.1.4	The leading term Test	74
2.1.5	Zeros and Multiplicities of Zero	76
2.1.6	Graphing of the Polynomial	77
2.2	Multiplication of Polynomials	79
2.2.1	Product of the monomials	79
2.2.2	Product of a Monomial and a Polynomial	79
2.2.3	Multiplying two Binomials	80
2.2.4	Product of two Binomials by Foil Method	80
2.2.5	Squaring of Binomials	82

2.2.6	Product of Higher order Polynomials	83
2.3	Evaluation and some more Algebra of Polynomials	84
2.3.1	Division of two Polynomials	84
2.3.2	Evaluating the Polynomial	86
2.3.3	Addition of Polynomials with different variables	87
2.4	Factoring of Polynomial	89
2.4.1	Introduction	89
2.4.2	Factoring by Grouping	90
2.4.3	Factoring by Middle Term Splitting	91
2.5	Quadratic Equations and its Solutions	93
2.5.1	Introduction	93
2.5.2	Square Root Property	93
2.5.3	Completing the Square	94
2.5.4	Quadratic Formula	98
2.5.5	Vertex Form of Quadratic Equations	102
2.5.6	Graph of a Quadratic Function in Vertex Form	103
2.5.7	Vertex of Parabola	105
2.6	Rational Functions	108
2.6.1	Introduction	108
2.6.2	Asymptotes	108
2.6.3	Graphing the Rational Function	112
2.7	Inequalities	115
2.7.1	Introduction	115
2.7.2	Polynomial Inequality	115
2.7.3	Rational Inequality	118
2.8	Applications of Polynomials and Rational Equalities and Inequalities	122
2.8.1	Applications of Polynomials	122
2.8.2	Applications of Polynomial and Rational Inequalities	124
2.9	Variation	127
2.9.1	Direct Variation	127
2.9.2	Inverse Variation	127
2.9.3	Joint Variation	128
2.9.4	Applications of Variations	128
	References	132

3. Exponential and Logarithmic Functions	133
Introduction	133
3.1 Exponential function	133
3.2 Graphing of exponential functions	136
3.3 Compute the exponential function base e	140
3.4 Use of exponential functions in various applications	143
3.4.1 Exponential curve through two points	145
3.4.2 Compound Interest using exponential functions	147
3.5 Logarithmic functions	152
3.6 Graphing of Logarithmic Functions	157
3.7 Conversion between Exponential & Logarithmic Functions	162
3.8 Use of logarithmic functions in various applications	166
3.9 Exponential & Logarithmic Equations	170
3.9.1 Solving Exponential Equations	170
3.9.2 Solving Logarithmic Equations	174
References	177
4. Matrices Determinants and its Applications	178
4.1 Elementary Row Operations	178
4.1.1 Introduction	178
4.1.2 Types of Matrices	179
4.1.3 Equality of Matrices	181
4.1.4 Trace of Matrix	182
4.1.5 Elementary Row Operations	182
4.1.6 Augmented Matrix	186
4.2 Arithmetic Operation on Matrices	190
4.2.1 Introduction	190
4.2.2 Addition & Subtraction	190
4.2.3 Transpose of a Matrix	193
4.2.4 Scalar Multiplication of a Matrix	195
4.2.5 Matrix Multiplication	197
4.2.6 Special type of Matrices	199
4.3 Determinant	204
4.3.1 Introduction	204
4.3.2 Properties of Determinant	206
4.3.3 Minors	206
4.3.4 Cofactors	207

4.4	Inverse of a Matrix	208
4.4.1	Introduction	208
4.4.2	Computing Inverse of a Matrix using Adjoint	209
4.4.3	Properties of Adjoint and Inverse	212
4.4.4	Computing Inverse of a Matrix using Gauss-Jordan Method	213
4.5	Solving System of Equations Using Matrices	215
4.5.1	Introduction	215
4.5.2	System of Linear Equations in Two Variables	217
4.5.3	System of Linear Equations in Three Variables	218
4.5.4	Inconsistent & Dependent Systems	220
4.5.5	Cramer's Rule for Solving System of Linear Equations in two variables	222
4.5.6	Cramer's Rule for Solving System of Linear Equations in three variables	224
4.6	Applications of System of Linear Equations	227
4.6.1	Introduction	227
	References	232

5. Functions and Relations 233

5.1	The Rectangular Coordinate System and Graphing Utilities	233
5.1.1	Plot points on a Rectangular Coordinate System	234
5.1.2	The Distance and Midpoint Formulas	235
5.1.3	Graph Equations by Plotting Points	240
5.1.4	Identify x and y-Intercepts	242
5.2	Circles	244
5.2.1	Write an Equation of a Circle in Standard Form	244
5.2.2	Write the General Form of an Equation of a Circle	247
5.3	Functions and Relations	248
5.3.1	Determine Whether a Relation is a Function	249
5.3.2	Apply Function Notation	251
5.3.3	Determine the x and y-intercepts of a Function Defined by $y = f(x)$	252
5.3.4	Determine Domain and Range of a Function	253
5.4	Linear Equations in Two Variables and Linear Functions	254
5.4.1	Graph Linear Equations in Two Variables	254

5.4.2	Determine the Slope of a Line	257
5.4.3	Apply the Slope – Intercept Form of a Line	259
5.4.4	Compute Average Rate of Change	261
5.5	Applications of Linear Equations and Modeling	265
5.5.1	Apply the Point – Slope Formula	265
5.5.2	Determine the Slopes of Parallel and Perpendicular Lines	267
5.5.3	Create a Linear Function in an Application	270
5.6	Transformations of Graphs	272
5.6.1	Recognize Basic Functions	272
5.6.2	Apply Vertical and Horizontal Translations	274
5.6.3	Apply Vertical and Horizontal Shrinking and Stretching	276
5.6.4	Apply Reflections across the x and y- Axes	280
5.6.5	Summarize Transformations of Graphs	282
5.7	Analyzing Graphs of Functions and Piecewise – Defined Functions	285
5.7.1	Test for Symmetry	285
5.7.2	Identify Even and Odd Functions	289
5.7.3	Graph Piecewise – Defined Functions 5-22	291
5.7.4	Investigate Increasing, Decreasing, and Constant Behavior of a Function	293
5.7.5	Determine Relative Minima and Maxima of a Function	294
5.8	Algebra of Functions and Function Composition	298
5.8.1	Perform Operations on Functions	298
5.8.2	Evaluate a Difference Quotient	302
5.8.3	Compose and Decompose Functions	304
	References	308

6. Analytic Geometry 309

	Introduction	309
6.1	Coordinate Geometry	311
6.1.1	The Distance Formula	312
6.1.2	The Section Formula	313
6.1.3	Slope of Line	315
6.1.4	Angle between the lines	316

6.2	Circle	317
6.2.1	Circle with centre at origin	317
6.2.2	Circles with centre not at origin	318
6.2.3	Parametric form of circle	320
6.2.4	Equation of a tangent to a circle	320
6.2.5	Equation of a normal to a circle	321
6.2.6	Director Circle	321
6.3	Ellipse	322
6.3.1	Ellipses with centre at origin	324
6.3.2	Ellipses with centre not at origin	328
6.3.3	Parametric form of ellipse	331
6.3.4	Auxiliary Circle	331
6.3.5	Equation of tangent of an ellipse	332
6.3.6	Equation of normal	334
6.3.7	Director Circle	334
6.3.8	Diameter and Conjugate Diameter of an Ellipse	335
6.3.9	Equation of Chord with middle point of an Ellipse	336
6.3.10	Ellipse and its applications	336
6.4	Parabola	337
6.4.1	Parabolas with Vertex at origin	338
6.4.2	Parabolas with Vertex not at origin	343
6.4.3	Equation of the tangent of a parabola	347
6.4.4	Equation of Director Circle of a Parabola	349
6.4.5	Equation of a normal to a parabola	350
6.4.6	Equation of Chord of a Parabola	351
6.4.7	Equation of Diameter of a parabola	351
6.4.8	Parabola and its applications	352
6.5	Hyperbolas	354
6.5.1	Hyperbolas with centre at origin	357
6.5.2	Hyperbolas with centre not at origin	358
6.5.3	Parametric form of points of a Hyperbola	363
6.5.4	Auxiliary circle of a Hyperbola	363
6.5.5	Equation of Tangent to a Hyperbola	364
6.5.6	Equation of the normal to the Hyperbola	365
6.5.7	Equation of director circle to the hyperbola	365
6.5.8	Equations of chord with middle point at (x_1, y_1) on the hyperbola	366

6.5.9	Equations of diameter and conjugate diameter of the hyperbola	366
6.6	Rectangular Hyperbola	367
6.6.1	Asymptotes	367
	References	370
	Index	371
