

# Table of Contents

<b>1</b>	<b>Introduction to Environmental Engineering</b>	<b>1</b>
1.1	Introduction	1
1.2	Environmental Engineering from an Engineer's Perspective	6
1.3	Ecological Engineering Services and Our Nation's Future	9
1.3.1	Growth of Human Civilization and its Environmental Impacts	9
1.4	Control Strategies	12
1.5	The Rise of Environmental Protection	16
1.5.1	Environmental Change	18
1.5.2	Universal Concern for Environment	19
1.5.3	Nature's Protection Starts with You	19
1.6	The History of the Future Environment	21
1.6.1	Your Kids, Your Environment, their Future - Should You be Concerned?	22

1.7	Efficient Energy Conversion: Utilizing Biosphere Technology	23
1.7.1	Save Natural Resources with Biosphere Technology	24
1.7.2	We are Creation of Our Environment	24
1.8	What are the Possibilities of Us Making Our Future Condition Pay-off in Fulfillment and Thriving?	25
1.9	References	27
<b>2</b>	<b>Importance of Chemistry in Our Lives</b>	<b>28</b>
2.1	Introduction	28
2.1.1	Important Reasons to Learn about Chemistry	28
2.2	Learning Chemistry 101	30
2.2.1	Science 101	30
2.3	Science Basics - What Everyone should Know about this Interesting Science	34
2.3.1	The Mathematics Necessary for Basic Chemistry	36
2.4	Important Events that Led to the Discovery of Quantum Mechanics	38
2.5	Solutions to Chemistry	41
2.5.1	Solutions and Solubility Part One	41
2.5.2	Solutes, Solvents, and Solutions	43
2.6	Stoichiometry of Chemical Reactions	45
2.6.1	Investigation of Wastewater - How to Identify Chemical Elements for Filtration	46
2.6.2	Concoction Analysis of Sodium Chloride	48
2.7	Water Chemistry	50
2.7.1	Equalization	50
2.7.2	Science of Wastewater - The 5 Stages of Chemical Analysis of Wastewater	51
2.7.3	The Rudiments of Water Chemistry	53
2.8	Chemical Reaction Kinetics	54
2.8.1	Basic Chemical Reactions	55
2.8.2	Crash Theory	57
2.8.3	Inconstancy of Reaction Rates	58
2.8.4	Stoichiometry and Reaction Rates	59
2.9	References	60
<b>3</b>	<b>A Process Engineering Approach to Solving Problems</b>	<b>61</b>
3.1	What is Process Engineering?	61

3.2	Contemplating becoming a Process Engineer?	62
3.2.1	Future of Process Engineering	63
3.2.2	Process Engineering Equipment for Manufacturing Industries	64
3.2.3	Process Engineering for Internet Solutions	66
3.2.4	Importance of Process Engineering	72
3.3	The Flow of Materials—Mass Balances	72
3.3.1	Industrial Layout - A Combination of Engineering and Architecture	72
3.3.2	Association of Material - An Important Part of Preparation for Speaking	74
3.4	The Flow of Energy—Energy Balances	77
3.4.1	Vitality - The Next Frontier for Engineers	77
3.5	Combined Material and Energy Balances / Numerical Methods	82
3.5.1	The Flow of Energy	82
<b>4</b>	<b>Water Resources</b>	<b>87</b>
4.1	Water Quantity	87
4.1.1	Working with Nature - Water Resource Management	87
4.2	Straightforward Ways to Save Our Water Resources	92
4.3	Surface Water Quality	94
4.3.1	Water Quality and What it Means to the Consumer	94
4.3.2	Water Quality Issues and How to Solve Them	96
4.3.3	Water Resources Research	98
4.3.4	Effects of Climate Changes on Water Resources in the Middle East	99
4.4	Microbiological Decomposition of Organic	102
4.4.1	Microbiological Activity in Soil	102
4.4.2	Decoding Basic Antioxidant Science	103
4.5	Minerals in Water	107
4.5.1	Water Purification Systems Worth Your While	107
4.5.2	The Benefits of Mineral Revitalization Water Purification Systems	108
4.6	BOD Kinetics	110
4.6.1	Wastewater Treatment BOD - How to Determine the Exact Value	110

## 5 Potable Water Treatment 112

5.1	Introduction	112
5.2	Source Water Characteristics	113
5.3	Standards of Drinking Water	115
5.4	Treatment Processes to Produce Potable Water	120
5.4.1	Coagulation and Flocculation	121
5.4.2	The Science behind Water's Turbidity	121
5.4.3	What is Flocculation?	122
5.4.4	Why are these Processes used?	122
5.4.5	Clarification	123
5.4.6	Filtration	123
5.4.7	Ozone	125
5.4.8	UV Light	125
5.4.9	Commonly used Disinfectants	126
5.5	Unit Operations of Water Treatment	127
5.5.1	Why are Pre-treatment Operations Implemented in Water Treatment Plants?	128
5.5.2	Advantages of Pre-treatment Operations	130
5.5.3	Why is Corrosion Control Necessary in Water Treatment Plants?	130

## 6 Wastewater Treatment 133

6.1	Introduction	133
6.2	Water Purification	134
6.3	Factors that Affect the Process of Wastewater Treatment	135
6.4	Characterization of Wastewater	137
6.5	Prefermenters	138
6.5.1	Data and Parameters Required for Wastewater Characterization	138
6.5.2	Solid Matter	139
6.5.3	Carbonaceous Organic Matter	139
6.5.4	Biochemical Oxygen Demand (BOD)	140
6.5.5	Chemical Oxygen Demand (COD)	141
6.5.6	Nitrogen	141
6.6	Standards for Wastewater Treatment	142
6.6.1	Interim Wastewater Treatment Plants	142
6.6.2	Permanent Wastewater Treatment Plants	144
6.7	Unit Processes	147

6.8	Processes of Domestic Wastewater Treatment	150
6.8.1	Benefits of Domestic Wastewater Treatment	151
6.9	Wetlands	152
6.9.1	Solid Processing	152
6.10	Material Balance Approach	152
6.11	WWTP Biological Kinetics	154
6.12	Septic Tanks	155
6.12.1	Benefits of using Septic Tanks	155
6.12.2	Limitations of Septic Tanks	155
6.12.3	Operation & Design of Septic Tanks	156
6.13	Sludge Treatment and Disposal	157
6.13.1	Sludge Characteristics	158
6.13.2	Destruction of Volatile Solids	159
6.13.3	Solids Capture	159
6.14	Primary Components of Sludge	159
6.14.1	Pathogens	160
<b>7</b>	<b>Air Resources</b>	<b>161</b>
7.1	Management of Air Resources	161
7.1.1	How Clean is your Air?	161
7.2	Indoor Air Quality - How Important it is for us?	163
7.2.1	Why are Air Purifiers Needed?	164
7.2.2	What Air Purifier?	164
7.3	Vitality Crisis Management - Alternative Energy Resources is the Answer	165
7.3.1	The Flight of Natural Resources	166
7.4	The Major Air Pollutants	168
7.4.1	Air Pollution - Causes, Effects and Sources of Air Pollution	168
7.4.2	Significant Effects of Air Pollution	171
7.4.3	Step by Step Instructions to Minimize Air Pollution	172
7.5	Global Issues	174
7.5.1	What are the Causes and Sources of Air Pollution?	174
7.5.2	What are the Wellsprings of Indoor Air Contamination?	176
7.6	Legislative and Regulatory Standards	177
7.6.1	Tips to Reduce Air Pollution and Help the Environment	177

7.6.2	Purifying Air Pollution	178
7.7	Air Pollution Control: Stationary Sources	180
7.7.1	What is an Air Pollution Control System?	180
7.7.2	A Quick Guide to Selecting Control Equipment for Air Pollution Services	181
7.8	Air Pollution Control: Mobile	184
7.8.1	Air Pollution Control Equipment as Solutions for Industrial Air Quality	184
7.8.2	Air Pollution can Occur within Your Home: Prevention is Key	185
7.9	Sources	187
7.9.1	What is Air Quality Control Systems?	187
7.10	Meteorology and Atmospheric Dispersion of Pollutants	190
7.10.1	Light Pollution Increases Air Pollution	190

## 8 Solid and Hazardous Waste Management 192

8.1	Municipal Solid Wastes	192
8.1.1	The Importance of Waste Management	192
8.1.2	Appropriate Waste Management Techniques	195
8.2	Landfill Disposal of MSW	195
8.2.1	Squander Disposal and Management of Waste	195
8.2.2	How would we Discard it?	197
8.2.3	Family Hazardous Waste and What can You do if You Find it	198
8.3	Thermal Destruction of Waste	205
8.3.1	Warm Oxidizers	205
8.4	Hazardous Wastes: Unsafe Waste Treatment and Recycling	209
8.5	Bio Hazardous Waste Disposal - An Unavoidable Necessity	216
8.5.1	What is Bio Hazardous Waste?	216
8.6	Site Remediation (Soil and Groundwater Cleanup)	217
8.6.1	Soil Remediation Process: Four Basic Steps of the Cleanup Effort	217
8.6.2	Soil Testing Lab Helps Determine Cost of Soil Cleanup	219
8.6.3	Participating in Giving Hope to the Environment through Environmental Remediation	220

<b>9 Risk Assessment</b>	<b>222</b>
9.1 Introduction	222
9.2 Methods that can be Followed to Develop a Strong Risk Framework	225
9.2.1 Studying the Area	225
9.2.2 Logic Model Development	225
9.2.3 Risk Elements	226
9.2.4 Implementation of Framework	226
9.2.5 Conclusion	227
9.3 Energy Resources	227
9.4 Methods to Bring Energy-efficiency in the Wastewater Facilities	227
9.4.1 Combining Energy	228
9.5 Nuclear Power and Radioactive Wastes	228
9.5.1 Renewable Resources of Energy	229
9.5.2 What is the Vacuum Evaporation of Radioactive Wastewater?	230
9.6 Indoor Air Quality	232
9.6.1 Studying the Air Pollutants and their Nature	233
9.6.2 Indoor Air Risk Assessments	233
9.6.3 Air Ventilation	235
9.6.4 Monitoring	235
9.6.5 Neurotoxins	235
9.6.6 Conclusion	235
9.7 Noise Pollution	236
9.8 Noise Control Mechanism	236
9.9 Can Wastewater Treatment Plants be Noise-free?	238
9.9.1 Placement of Equipment	239
9.9.2 Ventilations	239
9.9.3 Noise Monitoring	240
9.9.4 Conclusion	240
<b>Index</b>	<b>241</b>
