

Table of Contents

Part I Role of Animals and Animal Science in Human Lives	1
1. The Place of Animals and Animals Science in the Lives of Humans	5
1.1. Animals	5
1.2. Human uses of Animals	7
1.3. Introduction to Animal Science	12
1.4. The Value of Animals to Humanity	14
1.5. Factors affecting the World Agricultural Structure	16
1.6. Worldwide Systems of Agricultural Production	18
References	20
2. Importance of Animals to Humanity	24
2.1. Introduction	24
2.2. The Food Uses of Agricultural Animals	26

2.3. Red Meat and Poultry Production	27
2.4. Edible Slaughter By-Products	27
2.5. Milk and Milk Products	28
2.6. Poultry and Eggs	30
2.7. Miscellaneous Food Uses	31
2.8. The Value of Animal Products in The Human Diet	32
2.9. The Non-Food Uses of Agricultural Animals	32
2.10. Body Coverings	33
2.11. Power Sources	33
2.12. Body Wastes	34
2.13. Pest and Weed Control	34
2.14. Storage of Capital And Food	35
2.15. Cultural Uses	35
2.16. Non- Food or Inedible Slaughter By-Products	36
2.17. Conservation	36
References	36

3. Factors affecting the World Agricultural Structure 38

3.1. Introduction	38
3.2. Economic and Social Circumstances	38
3.2.1. Labor	39
3.2.2. Finance (Capital)	39
3.2.3. Technology	39
3.2.4. Markets	39
3.2.5. Government	39
3.3. Environmental Factors	40
3.3.1. Climate	40
3.3.2. Relief	40
3.3.3. Soil	40
3.3.4. Adaptation	40
3.4. Artificial Environments	41
3.5. Natural Environment	41
3.6. Adaptive Changes	42
3.7. Climatic Environments of The World	43
3.7.1. Tropical Climates	44
3.7.2. Deserts	45
3.7.3. Cold Environments	46
3.7.4. Alpine Environments	47

3.7.5.	Polar Environments	47
3.7.6.	Periglacial Environments	47
3.7.7.	Glacial Environments	47
3.7.8.	Temperate Climate	48
3.8.	Social and Cultural Differences	49
3.8.1.	Language Difference	50
3.8.2.	Taboos and Traditions	50
3.8.3.	Values in Society	51
3.8.4.	Religion	51
3.8.5.	Levels of Economic Development	52
3.8.6.	Levels of Agricultural Developments	53
3.9.	Economic Institutions and Agriculture Development	55
3.9.1.	Economics Institutions	55
3.9.2.	Agriculture Development	55
	References	56
4.	Worldwide Systems of Agricultural Production	58
4.1.	Introduction	58
4.2.	Nomadism and Transhumance	59
4.2.1.	Nomadic Pastoralism	59
4.2.2.	Transhumance Pastoralism	60
4.3.	Shifting Cultivation and Rudimentary Sedentary	61
4.3.1.	Shifting Cultivation	61
4.3.2.	Rudimentary Sedentary	62
4.4.	Tillage	62
4.5.	Paddy Rice Farming	63
4.4.1.	Rice Farming	63
4.4.2.	Paddy Farming	65
4.6.	Peasant Grain, Tuber, and Livestock Farming	66
4.7.	Ranching	68
4.8.	Commercial Crop and Livestock Farming	68
4.9.	Commercial Livestock Finishing	69
4.10.	Commercial Dairy Farming	70
4.11.	Commercial Grain Farming	71
4.12.	Mediterranean Agriculture	72
4.13.	Market Gardening	73
4.14.	Commercial Plantation	74
4.15.	Urban Agriculture	74

4.16. Aquaculture	75
4.17. Developed Versus Subsistence Agriculture	76
4.18. Differentiation Between The Livestock Industry Amongst The Developed and Developing Countries	76
References	78

Part II The Biological Sciences of Animal Science 80

5. Introduction to Animal Nutrition 84

5.1. Uses of Nutrients	85
5.2. Nutritional Needs Based on The Functions of The Body	85
5.3. Importance of Feed Analysis For Animals	87
5.4. Why Should We Determine The Value of The Feedstuffs For Animals?	89
5.5. Feed Composition Based on Dry Matter	90
5.6. Measures of Energy	90
5.6.1. Energy Content of Food	91
5.6.2. Efficiency of Energy usage by Animals	91
5.6.3. Nutrient Requirements	91
5.7. Formulation of Ration For Feeding Animals	92
References	92

6. The Gastrointestinal Tract and Nutrition 94

6.1. Introduction	94
6.2. Classification of Digestive Systems	96
6.3. An Overview of The Steps of Digestion	98
6.4. Digestion in The Pigs	100
6.5. Digestion in The Ruminant	101
6.6. The Fermentation Process	103
6.7. Advantages and Disadvantages of The Ruminant System	103
6.8. Digestion in The Avian	104
6.9. Digestion in The Horse	105
References	108

7. Everything about Feedstuffs Classification 109

7.1. Introduction	109
7.2. Feedstuff Categories	110
7.2.1. Dry Forages and Roughages	111
7.2.2. Pasture, Range Plants, and Green Forages	113

7.3. Protein Supplements	114
References	114
8. Brief about Genetics	116
8.1. Introduction of Genetics	116
8.2. What Is A Gene?	117
8.3. Principles of Inheritance	118
8.3.1. The Start of Genetics	118
8.3.2. How did Mendel Successful?	119
8.3.3. The Genes	119
8.3.4. The Genotype	119
8.3.5. A Phenotype	119
8.3.6. A Segregation	119
8.3.7. The Assortment	119
8.3.8. A Chromosomes	119
8.3.9. The Crossing-over	120
8.3.10. The Mutation	120
8.4. Mitosis and Meiosis	121
8.4.1. Introduction Mitosis and Meiosis	121
8.4.2. Difference between Meiosis and Mitosis	121
8.5. Mitosis	122
8.6. Meiosis	123
8.7. Gene Expression	124
8.7.1. Dominant and Recessive Expression	125
8.7.2. Codominance	126
8.7.3. Incomplete Dominance	127
8.7.4. Epitasis	128
8.7.5. Multiple Alleles	129
8.8. Test Crossing	129
8.8.1. Sex-Related Inheritance	130
8.8.2. Sex-Linked Inheritance	130
8.8.3. Sex-Influenced Inheritance	132
8.8.4. Sex-Limited Traits	132
8.9. Population Genetics	133
8.10. Gene Frequency	134
8.11. Animal Breeding and Population Genetics	135
8.12. Mutation and Genetic Drift	136
8.12.1. Mutation	136

8.12.2. Genetic Drift	137
8.13. Migration and Selection	138
8.14. Quantity Versus Quality Traits	138
8.14.1. Qualitative and Quantitative Traits	139
8.14.2. Qualitative Traits	139
8.14.3. Quantitative Traits	139
8.15. Heritability	139
8.16. Systems of Mating	140
8.17. Biotechnology and Genetic Engineering	141
8.18. Genetic Engineering	142
8.18.1. Biotechnology	142
References	142

9. Brief about Animal Breeding **145**

9.1. Introduction	145
9.2. Beef Cattle Genetic Improvement	147
9.3. Heritability	149
9.4. Genetic Correlations	150
9.5. Performance Information	151
9.6. Genetic Evaluation, Breeding Value, and Expected Progeny Difference	152
9.7. Growth Trait Epds	153
9.8. Breed Average Epd and Base Year	154
9.9. Accuracy	155
9.10. Possible Change	155
9.11. Sire Summaries	156
9.12. Maternal Trait Epds, Milk Epds, Combined Maternal Epd	157
9.13. Carcass Epd	158
9.14. Mature Size	159
9.15. Use of Epds	159
9.16. Use of Epds For Selection in Seedstock Herds	160
9.17. Use of Epds For Selection in Commercial Herds	160
9.18. Pedigree Estimated Epds	161
9.19. Across- Breed Epds	161
9.20. Epds and Crossbreeding	162
9.21. Dairy Cattle Genetic Improvement	162
9.22. Heritability Estimates	163
9.23. Dhi Systems	163

9.24. Animal Model	164
9.25. Sire Selection	165
9.26. Swine Genetic Improvement	165
9.27. Sheep Genetic Improvement	166
9.28. Heterosis in Sheep Breeding	167
9.29. National Sheep Improvement Program [Nsip]	167
References	168
10. Brief about Biotechnology and Genetic Engineering	170
10.1. Introduction	170
10.2. Nuts and Bolts of Genetic Engineering	171
10.3. Restriction Enzymes	172
10.4. Gene Cloning	172
10.5. Polymerase Chain Reaction	173
10.6. Gene Mapping	174
10.7. Biotechnology and/Or Genetically Engineered Organisms	174
10.8. Applications of Biotechnology	175
10.8.1. Application of Biotechnology in the field of Medicines	175
10.8.2. Application of Biotechnology in Agriculture	175
10.9. Micropropagation	175
10.10. Transgenic Animals	176
10.11. Livestock	176
10.12. Agricultural Applications	177
10.13. Disease Resistance	178
10.14. Biomedical Applications	178
10.15. Transgenic Pets	179
10.16. Medicine	179
10.17. Genetic Testing	180
10.18. Gene Therapy	180
10.19. Pharmacogenomics	181
10.20. Microorganisms and Recombinant Dna	181
10.21. Technology	182
10.22. Drug and Vaccine Production	182
10.23. Biotechnology and Pest Management	183
10.24. Bacteria Engineered For The Foods Industry	183
10.25. Societal Concerns	184
References	185

11. Everything about Animal Reproduction	183
11.1. Introduction	183
11.2. Puberty	184
11.3. Endocrinology	185
11.4. Anatomy	186
11.4.1. Female	186
11.4.2. Male	187
11.5. Pregnancy	188
11.5.1. Pregnancy Testing	188
11.6. Parturition	189
11.7. Environmental Influences on Reproduction	190
11.8. Technology and Reproduction	191
11.8.1. Artificial Insemination	192
11.8.2. Embryo Transfer	192
11.8.3. “In Vitro” Fertilization	193
11.9. Reproduction in Poultry and Birds	193
11.9.1. Hen	194
11.9.2. Egg Fertilization	194
11.9.3. Egg Development Inside Your Hen	194
11.9.4. The Incubation Process	194
11.9.5. Cock	195
11.9.6. Deferent Duct	195
11.9.7. Testicles and Sperm	195
References	196
12.A Brief about Lactation	197
12.1. Introduction	197
12.2. Mammary Gland Development, Anatomy, and Function	198
12.3. Components of Milk	199
12.3.1. Carbohydrates	200
12.3.2. Protein	200
12.3.3. Lipids	201
12.3.4. Calcium	202
12.4. Factors Affecting Milk Mineral Content	202
12.4.1. Breed/Genetics	203
12.4.2. Condition/Management	203
12.4.3. Nutrition	203
References	204

13. Brief about Animal Behavior	205
13.1. Introduction	205
13.2. Areas of Study in Animal Behavior	206
13.2.1. Ethology	206
13.2.2. Comparative Psychology	206
13.3. Communication	206
13.4. Aggression and Social Structure	207
13.5. Biological Rhythms and Sleep	208
13.6. Sexual Behavior	208
13.7. Development of Behavior	208
13.8. Learning	209
13.9. Injunctive Behavior: Food and Water Intake	209
13.10. Behavioral Disorders	210
13.11. Livestock Behavior	211
13.12. Temperament	211
13.13. Training and Habituating Livestock To Handling and Restraint	211
13.14. Effects of Novelty	212
13.15. Vision	212
13.16. Noise	212
13.17. Fight Zone	213
13.18. Herd Animals	213
13.19. Genetic Differences	213
13.20. Handler Dominance	214
13.21. Handling Facility Layout	214
13.22. Improved Handling Practices	214
13.23. Summary	215
References	215
14. Brief about Animal Health	217
14.1. Introduction	217
14.2. Diseases	218
14.2.1. Causes of Disease	219
14.3. Mobile Veterinary Services	220
14.4. Animal Clinics/Hospitals	221
14.5. Programmed Health Management	222
14.6. Resident Veterinarian	222

14.7. Diagnostic Services	223
14.8. The Body's Defense Against Disease	223
14.9. Herd Health and Management	223
14.10. Nutrition and Genetics	225
14.11. Prevention	226
14.12. Animal Diseases, Human Wellbeing, and Emotional Loss	226
14.13. Effects of Animal Diseases on Humane Health, National Economics, and Farm Income	227
14.14. Bioterrorism	228
14.15. Regulation of Animal Medicines	228
