

Table of Contents

1	The Ingredients of Food Materials	1
1.1	Introduction	1
1.2	Mechanical Treatment of Food Materials	2
1.2.1	Mechanical Properties: Explanation	2
1.2.2	Rheological Properties and Imitations	4
1.3	Thermal or Heat Properties	4
1.4	Electrical Properties	6
1.5	System and Structure of Food Materials	6
1.6	Water Activity of Food Materials	8
1.6.1	The Role of Water in the Scope of Food Materials	9
1.6.2	Water Activity: Implications	9
1.6.3	Water Activity: Estimation	10

1.6.4	Water Activity: Impact on Food Stability and Food Quality	11
1.7	Phases of Food Transitions	13
1.7.1	Glass Transition of Food and Temperature.	14
1.8	Conclusion	15
1.9	Reference	15
2	Chemical and Physical Properties of Fluids	16
2.1	Introduction	16
2.2	Elements of Fluid Dynamics	17
2.2.1	Viscosity	17
2.2.2	Regimes for Flow of Fluids	18
2.2.3	Application of Newtonian Laminar Flow	19
2.2.4	Turbulent Flow of Fluids	25
2.3	Properties of Flow in Fluids	28
2.3.1	Multiple Kinds of Fluid Flow Behaviour	28
2.3.2	How the Non–Newtonian Fluid Flows through Pipes	30
2.4	Mechanism for Transporting Fluids	31
2.4.1	The Bernoulli Equation and the Insights of Energy Relations	31
2.4.2	Different types of Pumps and their Operation	33
2.4.3	Pump Selection	39
2.4.4	Ejectors	39
2.4.5	Piping	41
2.5	Flow of Particulate Solids (Powder Flow)	41
2.5.1	Introduction	41
2.5.2	Flow Properties of Particulate Solids	42
2.5.3	Fluidization	46
2.5.4	Pneumatic Transport	48
2.6	Reference	50
3	Principles Governing The Mass and Heat Transfer By a Body	52
3.1	Introduction	52
3.2	Primary Associations on Occurrences of Transmission	54
3.3	Apparatus for the Transfer of Heat and Mass	55
3.4	Conductive Transfer of Heat and Mass	56

3.4.1	The Fick and Fourier's Law	57
3.4.2	Incorporation of Fick's and Fourier's Law for Steady-State Conductive Transmission	58
3.4.3	Thermal Conductivity, Thermal Diffusivity, and Molecular Diffusivity	59
3.5	Convective Heat and Mass Transfer	61
3.5.1	Transfer of Film Heat and Mass Coefficients	62
3.5.2	Empirical Correlations for the Convective Heat and Mass Transfer	63
3.6	Unsteady State in the Transfer of Mass and Heat	64
3.6.1	Solution of Fourier's Second law for an equation of an Infinite Slab	66
3.7	Primary Principles of Microwave Heating	67
3.8	Reference	68
4	Mechanism Behind Various Kind of Kinetic Reaction	70
4.1	Introduction	70
4.2	The Basic Concepts	73
4.2.1	Elementary and Non-elementary Reactions	73
4.2.2	Reaction Order	73
4.2.3	The Effect of Temperature on Reaction Kinetics	76
4.3	Kinetics of Biological Processes	78
4.3.1	Enzyme-catalyzed Reactions	78
4.4	Residence Time and Residence Time Distribution	82
4.4.1	Reactors in Food Processing	82
4.4.2	Residence Time Distribution	83
4.5	Reference	84
5	Mechanisms Controlling the Elements of Food Processing	85
5.1	Introduction	85
5.2	Importance of the Elements of Process Control	87
5.3	Theories of Process Control	88
5.3.1	Control Theory	88
5.4	Process Control Terms	89
5.5	Different Control Systems	91
5.5.1	Basic Control Systems	92
5.5.2	Closed and Open Control Loops	93

5.5.3	Comparative Merits and Control Strategies	93
5.6	Control Algorithms	94
5.6.1	On-off Control	94
5.6.2	Proportional Control	95
5.6.3	Integral Control	95
5.6.4	Proportional-integral Control	96
5.6.5	Proportional- integral -differential Control	96
5.7	Primary Elements of Control	96
5.7.1	Transducers and Convertors	97
5.7.2	Transmitters	97
5.7.3	Controllers	97
5.7.4	Actuators	98
5.8	Reference	98
6	Techniques and Necessity for Reducing the Size of Food Particles	99
6.1	6.1 Introduction	99
6.2	Objective of Size Reduction	100
6.2.1	Process of Size Reduction	101
6.3	Equipment used for Size Reduction	102
6.4	Analysis of energy	106
6.5	Conclusion	106
6.6	Reference	107
7	The Process of Decantation and Centrifugation	108
7.1	Introduction	108
7.2	Basic Principles	110
7.2.1	The Continuous Settling Tank	110
7.2.2	From the Settling Tank to Tubular Centrifuge	112
7.2.3	The Baffled Settling Tank and the Disc Bowl Centrifuge	113
7.2.4	Liquid-liquid Separation	114
7.3	Centrifuges	115
7.3.1	Tubular Centrifuges	116
7.3.2	Disc Bowl Centrifuges	116
7.3.3	Decanter Centrifuges	117
7.3.4	Basket Centrifuges	117
7.4	Cyclones	118

7.5	Reference	119
8	Application and Commercial Usage of Membrane Processes	120
8.1	Introduction	120
8.2	Tangential Filtration	121
8.3	Transfer of Mass	122
8.4	Solute Transport	122
8.5	Concentration Polarization and Gel Polarization	123
8.6	Membrane Systems	124
	8.6.1 Membrane materials	124
	8.6.2 Membrane Configurations	127
8.7	Reference	128
9	Tactics in Extraction of Solid and Liquid Food	129
9.1	Introduction	129
9.2	Extraction of Solid-Liquid	130
	9.2.1 Definition	130
	9.2.2 Balance of Material	132
	9.2.3 Congruency/ Equilibrium	132
	9.2.4 Extraction in Multistage	133
	9.2.5 Stage Effectiveness/ Efficiency	133
	9.2.6 Systems of Extraction of Solid-liquid	135
9.3	Extraction of Supercritical Fluid	136
	9.3.1 Fundamental Principles	136
	9.3.2 Supercritical Systems of Extraction	137
	9.3.3 Applications	137
9.4	Extraction of Liquid-liquid	138
	9.4.1 Principles	138
	9.4.2 Applications	138
9.5	Conclusion	139
9.6	Reference	139
10	Principles Involved in Monitoring the Adsorption & Ion Exchange Process	140
10.1	Introduction	140
10.2	Equilibrium Conditions	141

10.3	Batch Adsorption	143
10.4	Adsorption in Columns	145
10.5	Ion-exchange	146
10.5.1	Basic principles	146
10.5.2	Properties of Ion Exchangers	147
10.5.3	Applications of Ion Exchange: Softening of Water	148
10.5.4	HCl regenerates the cation exchanger, while NaOH regenerates the anion exchanger. Application of Ion-exchange: Reducing the Levels of Acidity in Fruit Juices	150
10.6	Reference	150
11	Appropriate Measures & Conditions for Distillations	151
11.1	Introduction	151
11.2	Applications of Distillation	153
11.3	Idealized Distillation Model	153
11.4	Vapor-liquid Equilibrium (VLE)	154
11.5	Continuous Flash Distillation	157
11.6	Differential (Batch) Distillation	159
11.6.1	Basic Concepts	160
11.6.2	Design and Analysis of Column	161
11.6.3	Effect of Reflux Ratio	163
11.7	Steam Distillation	164
11.8	Reference	164
12	The Process of Crystallization of Solutions	165
12.1	Introduction	165
12.2	Kinetics of Crystallization	166
12.2.1	Nucleation	166
12.2.2	Crystal Growth	168
12.3	Crystallization in the Food Industry	171
12.3.1	Instruments	171
12.3.2	Processes	172
12.4	Dissolution	175
12.4.1	Introduction	175
12.4.2	Kinetics and Mechanism	176
12.5	Reference	179

13 Extrusion Techniques in Food Processing	180
13.1 Introduction	180
13.2 The Single-screw Extruder	182
13.3 Twin Screw Extruders	184
13.4 Effect on Foods	187
13.4.1 Physical Effects	187
13.4.2 Chemical Effect	187
13.5 Application of Extrusion	188
13.5.1 Extrusion of Pasta	188
13.5.2 Expanded Snacks	188
13.5.3 Ready-to-eat Cereals	189
13.5.4 Pellets	189
13.5.5 Other Extruded Products	190
13.5.6 Confectionery and Chocolate	190
13.5.7 Pet Foods	191
13.6 Reference	191
14 Necessity of Food Preservation	192
14.1 Introduction	192
14.2 Food Spoilage	193
14.2.1 Signs of Spoilage of Food	194
14.2.2 Consequences of Consuming Spoiled Food	195
14.2.3 Causes of Spoilage of Food	195
14.3 Food Preservation	199
14.4 Reference	205
15 Food Processing's Association with Thermal Processing	206
15.1 Introduction	206
15.2 The Thermal Immobilization: Kinetics in Enzymes and Microorganisms	208
15.2.1 Decimal Reduction Time: Concept	208
15.2.2 Impact of Temperature on the Level of Thermal Immobility	210
15.3 Thermal Process: Lethality	212
15.4 Thermal Process Optimization: Quality	213
15.5 Thermal Processing: Consideration of Heat Transfer	214
15.5.1 Thermal Processing: In-package	214

15.5.2	Thermal Processing: Inflow	214
15.6	Conclusion	215
15.7	Reference	216
16	Methods and Equipment Gearing the Thermal Processing	217
16.1	Introduction	217
16.2	Thermal Processing Technique in Hermetically Closed Receptacle	218
16.2.1	Filling the Metal Cans	218
16.2.2	Reasons for Expelling Air from the Headspace	219
16.2.3	Sealing	220
16.2.4	Heat Processing	221
16.3	Thermal Processing in Bulk, Before Packaging	224
16.3.1	Bulk Heating - Hot Filling - Sealing - Cooling in Container	224
16.3.2	Bulk Heating - Holding - Bulk Cooling - Cold Filling - Sealing	225
16.3.3	Aseptic Processing	225
16.4	References	227
17	Cooling Methods and Tactics of Food Processing	228
17.1	Introduction	228
17.2	Effect of Temperature on Food Spoilage	230
17.2.1	Temperature and Chemical Activity	230
17.2.2	Effect of Low Temperature on Enzymatic Spoilage	232
17.2.3	Effect of Low Temperature on Micro-organism	233
17.2.4	Effect of Low Temperature on Biologically Active (Respiring) Tissue	234
17.2.5	The Effect of Low Temperature on Physical Properties	237
17.3	Freezing	237
17.3.1	Phase Transition, Freezing Point	238
17.3.2	Effect of Freezing and Frozen Storage on Product Quality	239
17.4	Reference	241

18 Equipment and Methods Used to Refrigerate Food	242
18.1 Introduction	242
18.2 Impact on Food Production and Agriculture	243
18.3 Current Applications of Refrigeration	244
18.4 Methods of Refrigeration	245
18.5 Freezing	247
18.6 Cold Storage and Refrigerated Transport	247
18.7 Freezers and Chillers	249
18.7.1 Evaporative Cooling	249
18.7.2 Immersion Cooling	250
18.7.3 Contact Freezers	251
18.7.4 Blast Cooling	251
18.8 Reference	252
19 The Process and Mechanics Behind Evaporation in Food	253
19.1 Introduction	253
19.2 Transfer of Heat	254
19.3 Loss of Volatile Flavor	257
19.4 Impact of Evaporation on the Quality of Food	258
19.5 Types of Evaporators used in the Food Industry	258
19.6 Reference	263
20 Lyophilization & Concentration Techniques in Food Processing	264
20.1 Introduction	264
20.2 Sublimation of Water	265
20.3 Transfer of Heat and Mass in Freeze-drying	266
20.4 Freezing	270
20.5 Freeze-drying in Commercial Establishments	271
20.6 Freeze Dryers	271
20.7 Freeze Concentration	272
20.8 Reference	273
21 Food Preservation Methods in Food Processing	274
21.1 Introduction	274
21.2 Materials of Packaging	276
21.2.1 Metals	277

21.2.2	Glass	278
21.2.3	Paper	278
21.2.4	Polymers	279
21.3	Transportation Properties	279
	Optical Properties	280
21.4	Mechanical Properties	281
21.5	Chemical Reactivity	281
21.5.1	Corrosion of Tin-plate	282
21.5.2	Migration of Chemicals	283
21.6	Packaging Atmosphere	283
21.6.1	Vacuum Packaging	283
21.6.2	Controlled Atmosphere Packaging	284
21.6.3	Modified Atmosphere Packaging	284
21.6.4	Active Packaging	285
21.7	Reference	285
22	Maintaining Proper Hygiene	286
22.1	Introduction	286
22.2	Cleaning Kinetics and Mechanism	287
22.2.1	Effect of the Contaminant	288
22.2.2	Effect of the Support	289
22.2.3	Effect of the Cleaning Agent	290
22.2.4	Effect of the Temperature	292
22.2.5	Effect of Mechanical Action (Shear)	292
22.3	Kinetics of disinfection	292
22.4	Cleaning of Raw Material	294
22.5	Cleaning of Plants and Equipment	295
22.5.1	Cleaning Out of Place (COP)	295
22.5.2	Cleaning in Place (CIP)	296
22.6	Cleaning of Packages	297
22.7	Odor Abatement	297
22.8	Reference	298
	Index	299
