

Table of Contents

1. Introduction to Green Chemistry	1
1.1. Introduction	1
1.2. More about Green Chemistry	2
1.3. The Twelve Principles	2
1.3.1 Atom Economy	3
1.3.2 Synthesis	3
1.3.3 Molecular Design	4
1.3.4 Solvents	4
1.3.5 Energy	4
1.3.6 Renewable Materials	4
1.3.7 Derivatives	5
1.3.8 Catalysis	5
1.3.9 Biodegradation	5

1.3.10	Analysis	6
1.3.11	Accident Prevention	6
1.4.	Future Challenges Related to Green Chemistry	7
1.4.1	Twelve Principles as a Cohesive System	7
1.4.2	Multi-functional Catalysts	7
1.4.3	To master the Weak Forces for Synthesis and Properties	7
1.4.4	Integrative Systems Thinking	8
2.	Doing without Phosgene, Hydrogen Cyanide, and Formaldehyde	9
2.1.	Phosgene	9
2.1.1	Uses of Phosgene	10
2.1.2	Traditional Method of Production of Isocyanates	10
2.1.3	Doing without Phosgene	12
2.2.	Hydrogen Cyanide	13
2.2.1	Uses of Hydrogen Cyanide	14
2.2.2	Doing without Hydrogen Cyanide	15
2.3.	Formaldehyde	16
2.3.1	Doing without Formaldehyde	16
3.	Everything about Chlorine Controversy	18
3.1.	Water - The Building Block of Life.	19
3.1.1	How Water gets Recycled in Nature?	19
3.1.2	Need for Water	20
3.1.3	Misuse of Freshwater	21
3.1.4	Pollution in Water	22
3.1.5	Effects of Water Pollution	27
3.1.6	Remedy for Water Pollution	28
3.2.	Introduction to Chlorine	28
3.2.1	Why chlorine is chosen over other Elements?	30
3.2.2	Structure and Properties of Chlorine	31
3.2.3	Production of Chlorine and Chlorine Compounds	31
3.2.4	Procedures for the Formation of Chlorine Compounds	35
3.2.5	Applications of Chlorine	37
3.2.6	Uses of Chlorine and their Effects	40
3.3.	Chlorine Controversy	43

4. Everything about Toxic Heavy-metal Ions	45
4.1. Introduction	45
4.2. Eradicating Heavy Metal Ions From Wastewater	47
4.3. Heavy metal ions are Additional Worry of Gas Sweetening Element	49
4.4. Methodology	50
4.5. Use of Non-materials for the Elimination of Heavy Metal From Wastewater	51
4.6. Electrospun Benefits	51
4.7. Iron-based Nanohybrids for Water Intractable Pollutant Dealing	52
4.8. Increasing Risk to Human Life	53
4.9. How it gets into our body?	53
4.9.1 Herbicides and Pesticides	53
4.9.2 Public Water	54
4.9.3 Air Pollution & Vehicle Exhaust	54
4.9.4 Personal Care Products	55
4.9.5 Dental Fillings	55
4.9.6 Some Pharmaceutical Drugs	55
4.9.7 Furniture	55
4.9.8 House and Car Keys	56
4.9.9 E-Cigarettes	56
4.10. Take Immediate Step to keep a Healthy Living	56
4.10.1 Methods	58
4.11. Results of Lead Arsenic and Mercury	58
4.11.1 Arsenic	58
4.11.2 Lead	59
4.11.3 Mercury	59
5. A Brief About Solid Catalysts & Reagents for Ease of Workup	60
5.1. What is Green Chemistry?	60
5.2. Solid Catalysts and Reagents	61
5.3. Different types of Solid Catalyst and Reagents	65
5.3.1 Metal Catalysts	66
5.3.2 Metal Oxide Catalysts	67
5.3.3 Metal Complexes	67

5.3.4	Biocatalysts	68
5.4.	Reagents in Green Chemistry for ease of workup	74
5.5.	Grignard Reactions	76
5.5.1	Selection of Substrates and Solvents for the Grignard Reaction	77
5.5.2	Results and Discussions	78
5.5.3	Aryl Grignard reactions for Benzyl Alcohol	79
5.5.4	Aryl Grignard reactions for Benzyl Tramadol	79
5.5.5	Heteroaromatic Grignard Reactions	79
5.6.	Summary	80

6. A Brief about Solid Acids and Bases 81

6.1.	Brief Introduction to Acids and Bases	82
6.1.1	Indication of Acid or Base	83
6.1.2	Explanation of Acids and Bases	84
6.2.	Strength of Acids and Bases	87
6.2.1	Equilibrium Constant for Measuring the Strength	88
6.3.	Brief about Acidity	90
6.4.	Structures and Properties of Acids and Bases	91
6.4.1	Structure of Acids and Bases	91
6.4.2	Properties of Acids	91
6.4.3	Properties of Bases	93
6.5.	Brief Introduction to Catalysis	94
6.5.1	Types of Catalysts	95
6.5.2	Positive and Negative Catalysts and Auto-catalysts	96
6.5.3	Working Principle of Catalysts	96
6.6.	Solid acids and Solid bases	98
6.7.	Uses of solid acid catalysts and solid base catalyst	99

7. Detailed Overview of Chemical Separations 101

7.1.	Introduction	101
7.2.	What is Chemical Separation?	102
7.3.	What is a Chemical way of Separation?	103
7.4.	Separation Process	103
7.5.	Seven Chemical Separations to change the world	109
7.5.1	Seven Separations	110
7.5.2	Other Steps	115
7.5.3	Method	116

8. Brief about Working Without Organic Solvent	117
8.1. Introduction	117
8.2. What do you mean by Organic Solvent?	118
8.3. Types of Organic Solvent	120
8.4. All you need to know about organic Solvent	121
8.4.1 Properties of Organic Solvent	121
8.5. How can one prevent itself from the harmful effects of Organic Solvent?	122
8.6. Possible Replacement of Organic Solvent	123
8.6.1 Bio-renewable Solvents	124
8.6.2 Greener Substitutes	124
8.6.3 Greener Chromatography Solvents	124
8.7. Bio-renewable Solvents as a replacement for Organic Solvent	125
8.7.1 Various Benefits of using Renewable Solvents	125
8.8. Working with Greener options and Bio-renewable Substance	127
8.8.1 The Evident Benefit of using Greener Solvent are as follows:	128
8.9. Summary	129
9. Detailed Overview of Biocatalysis & Biodiversity	130
9.1. Introduction	130
9.2. Advantages	131
9.3. Limitations	131
9.4. Biocatalysts	131
9.5. Enzyme Kinetics	132
9.5.1 Enzyme Reactions	132
9.5.2 Factors Affecting Enzyme Activity	133
9.6. Technique of Biocatalysis	134
9.6.1 Ethanol Production	134
9.6.2 Enzyme Immobilization	134
9.7. Immobilization Methods	135
9.7.1 Adsorption	135
9.7.2 Electrodeposition	136
9.7.3 Covalent Bonding	136
9.7.4 Entrapment	137

9.7.5	Encapsulation	137
9.7.6	Whole Cells	137
9.8.	Enzymes in Organic Solvents	137
9.9.	Chymotrypsin Catalysis	138
9.9.1	Increase in Thermal Stability	138
9.9.2	Catalytic Antibodies	138
9.9.3	White Biotechnology	138
9.10.	Uses of enzymes in industries	139
9.11.	Biodiversity	140
9.12.	Distribution of Biodiversity	140
9.12.1	Types of Biodiversity	140
9.13.	Biodiversity of India	141
9.14.	Importance of Biodiversity	141
9.15.	Uses of Biodiversity	142
9.16.	Threats to Biodiversity	142
9.17.	Conservation of Biodiversity	143
9.17.1	Biospheres and Biodiversity Reserves	143
9.17.2	Hotspots	144
9.17.3	Desert National Park	144
9.17.4	Wildlife Corridors	144
9.17.5	International Efforts	144
9.17.6	World Conservation Union, IUCN	145
9.17.7	United Nations Environment Program, UNEP	145
9.17.8	The Worldwide Fund for Nature, WWF	145
9.17.9	Global Environment Facility	145
9.17.10	United Nations Educational, Scientific, Cultural Organization	145
9.17.11	The World Resources Institute	145
9.17.12	Global Biodiversity Assessment	146
9.17.13	Man and Biosphere Program MAB	146
9.18.	Recent Development	146
9.18.1	Global Biodiversity Challenge	146
9.18.2	Global Biodiversity Outlook	146
9.19.	Summary	147
10.	Detailed Overview of Stereochemistry	148
10.1.	Introduction	148
10.2.	Various Definitions	149

10.3. Uses of Stereochemistry	150
10.4. History of Stereochemistry	151
10.5. Significance of Stereochemistry	151
10.5.1 Thalidomide Example	151
10.6. Describing a molecules' stereochemistry	152
10.7. Types of Stereoisomerism	153
10.8. Atropisomers	153
10.8.1 Scope of Atropisomer	154
10.9. Stereochemistry and its role in drug design	154
10.10. Chirality and Antimicrobial agent	156
10.11. Important terms	158
11. Detailed Overview of Agrochemicals	160
11.1. Introduction	160
11.2. History of Agrochemicals	161
11.3. Ecology	162
11.4. Fertilizers	162
11.4.1 Fertilizers History	162
11.4.2 Mechanisms of Fertilizers	163
11.4.3 Production	164
11.5. Liming and Acidifying Agents	166
11.6. Pesticides	167
11.6.1 Type of Pesticides and their Target Pest Group.	168
11.6.2 Uses of Pesticides	168
11.6.3 Alternatives for Pesticides	169
11.6.4 Classified by type of Pest	169
11.7. Soil Conditioners	171
11.7.1 Composition	171
11.7.2 Purpose of the Soil Conditioners	171
11.7.3 Application	172
11.8. Agrochemicals used for the Animal Husbandry	172
11.9. Advantages of using Agrochemicals	173
11.10. Disadvantages of using Agrochemicals	173
12. Useful Materials for a Sustainable Economy	175
12.1. Introduction	175
12.2. Economic Growth	177
12.3. The beginning of a new era in the study of Economics	178

12.4. The History of Green Chemistry	178
12.5. Criteria for Green Chemicals	180
13. Brief about Chemistry of Long-wear	186
13.1. Introduction	186
13.2. Better Living through Green Chemistry and Pharmaceuticals	187
13.2.1 The curse of Immortality	188
13.2.2 Clean Water Systems – a Necessity	188
13.2.3 Short Lived Molecules	188
13.2.4 Designing of Biodegradable Pharmaceuticals	189
13.3. Better living through food and drink through the Chemistry of long wear	189
13.4. Chemistry of long wear and Packaging	190
13.5. Long wear Chemistry and the safe use of Cosmetics	191
13.6. Clothing and the Chemistry of long wear	191
13.7. Synthetic Polymers – Uses and effects	191
13.8. Diverse application of sulfur in the Chemistry of long wear	193
13.9. The use of Polysulfides for Environmental Protection and Remediation	194
13.10. Production of sulfur from citrus fruit	194
13.11. Electrospinning	196
13.12. Sustainable and long wear Energy Production and Storage through Polysulfide	197
14. Brief About Chemistry of Recycling	198
14.1. Recycling	199
14.1.1 The History of Recycling	200
14.1.2 Supply	201
14.2. Recycling Consumer Waste	202
14.2.1 Source Separation	203
14.2.2 Buyback Centers	204
14.2.3 Drop-off Centers	204
14.2.4 Distributed Recycling	205
14.2.5 Sorting	205
14.3. Recycling Industrial Wastes	207
14.4. E-Waste Recycling	208
14.5. Plastic Recycling	209

14.6. Chemical Wastes	211
14.7. Waste Management	213
15. Detailed Overview of Energy and the Environment	216
15.1. Energy	216
15.1.1 Introduction	216
15.2. Radiant energy from the Sun	217
15.2.1 Electromagnetic Radiation	218
15.2.2 Direct and Indirect Solar Energy	219
15.3. Green Engineering and Energy Conversion Efficiency	221
15.4. Renewable Energy Sources	223
15.4.1 Solar Energy:	223
15.4.2 Wind Energy:	224
15.4.3 Biomass Energy:	224
15.4.4 Geothermal Energy:	225
15.4.5 Nuclear Energy:	225
15.5. The Environment and Environmental Spheres	225
15.6. Environmental Chemistry	228
15.7. Environmental Pollution	228
16. Everything about the Population and Environment	229
16.1. Population	229
16.1.1 Introduction	230
16.1.2 Past Population	230
16.1.3 Population Growth	231
16.1.4 Population Control	233
16.2. Environment	234
16.2.1 Introduction	234
16.2.2 Population Growth and its Impact on the Environment	235
16.2.3 Negative Impacts	236
16.3. Environmental threats and Opportunities	236
16.4. Environmental Challenges:	237
16.5. Pressure on the lands	237
16.6. Land and Soil Degradation	238
16.7. Forest Resources	239
16.8. Habitat Destruction and the loss of Biodiversity	240
16.9. Changing the Consuming Patterns	241

16.10. Air pollution, Global Warming, and Climate Change	242
17. Detailed Overview of Environmental Economics	244
17.1. Introduction	244
17.2. Sustainability	245
17.3. Restoration of Natural Capital	246
17.4. Roots in Pollution Prevention	246
17.5. Design for the Environment	248
17.6. Successful Projects of Environmental, Economical Design	251
17.7. Techniques used by the States for an Advanced Design for the environment	252
17.8. Application and establishment of the environmental, economic program	253
17.9. Economic Incentives for Green Chemistry and Design for Environment	254
17.9.1 Set up a fund for Research and Development.	254
17.9.2 Provides Tax Incentives	255
17.9.3 Provides Investment Tax Credits, Loan Guarantees, Low-interest loans, or subsidies for Manufacturing Equipment or Products Based on Green Chemistry.	255
17.9.4 Provide Incentives Tied to Economic Development Projects.	255
17.10. Recognition Programs	256
17.10.1 Implementation of The Environmental Economics Program and Design For the Environmental Awards Program.	256
17.10.2 Recognition of Top Poster Displays at Conferences.	256
17.11. Regulations and Policy Tools	256
17.11.1 Requires Environmentally Responsible State Purchasing.	256
17.11.2 Application of Fee or Tax to Substances of High Concern.	256
17.11.3 Negotiation of Supplemental Environmental Projects Focused on GC and DfE in Enforcement Settlements.	257

17.11.4 Preparation of GC Action Plans for Chemicals of High Concerns.	257
17.11.5 Requires Safer Alternative Planning.	257
17.11.6 To Restrict Chemicals and Products of Concern.	257
17.11.7 Preparation of list of Chemicals of Concern.	257
17.12. The Roles played by Educational Institutions	258
17.12.1 Create a Green Chemistry Educational Network.	258
17.12.2 Also, offers GC and DfE college Courses.	258
17.12.3 Provides GC and DfE Scholarships and Internships and Graduate Student Support.	259
17.12.4 Promotes and Encourages K 12 Education Programs.	259
17.12.5 Establishing Consortia of State Research Universities to Support Environmental Economics.	259
17.12.6 Convenes Innovation Focused Industry Dialogues.	259
17.12.7 Hosting a Symposium for the Industry.	260
17.13. Information Toolbox for Environmental Economics	260
17.14. Environmental Economics and its Design for the Future	261
17.15. Green Screen	262
17.16. Pet Profiler	262
17.17. Chemical Toxicity Data	262
17.18. Exposure Assessment Tools	263
18. Brief about Greening	264
18.1. Going green	264
18.2. What is Greening?	265
18.2.1 Facade Greening Through Several Supporting Hiking Plants on Climbing Aids	265
18.3. Benefits of Greening	266
18.3.1 Ecological Benefits	266
18.3.2 Low-cost and Financial Benefits	267
18.3.3 Wellness Benefits	268
18.4. Greening Business	268
18.5. Benefits of going Green Business	271
18.5.1 Authorized and Governing Compliance	271
18.5.2 Ability Saves Finances	271
18.5.3 Green Business Understanding	271
18.5.4 Influence on Representative Confidence	272

18.6. Green as a Must-have	272
18.7. Nine conduct to go Green and Protect Green	272
18.7.1 Save Energy to Save Money.	273
18.7.2 Save Water to Save Money.	273
18.7.3 Eat Smartly.	274
18.7.4 Leave the Bottled Water.	274
18.7.5 Think before you Purchase.	275
18.7.6 Borrow Despite Purchasing.	275
18.7.7 Purchase Smartly.	275
18.7.8 Stay Electronics out of the Garbage.	275
18.7.9 Create Cleaning Supplies of yours.	276
18.8. Greening in India	276
19. References	278
20. Abbreviations	306
Index	310
