

Table of Contents

1	The Importance and Evolution of Irrigation in the World	1
1.1	Irrigation System	1
1.2	History of Irrigation System	3
1.3	Present Irrigation System	6
1.4	Future of the Irrigation	7
1.5	Sub-Irrigation	8
1.6	Developing the Irrigation Facility	9
1.7	Water Sources for Irrigation	9
1.8	Disadvantages of Irrigation Method	11
1.8.1	Water Quality:	12
1.8.2	Fish and Live Stocks:	13
1.8.3	Groundwater mining with Wells	13
1.8.4	Groundwater Quality and Reduced Downstream Drainage:	13

1.9	Advantages of Irrigated System	14
1.9.1	Importance of irrigation:	15
1.9.2	Nutrients and Soil Preservation:	16
1.9.3	Disease and Weed Control:	16
1.9.4	Water and Time Conserving:	16
1.10	Improving the Production by Irrigation method	16
1.10.1	Irrigation Systems	17
1.10.2	Small Scale Irrigation	17
1.10.3	Wastewater for Irrigation	18
1.11	Reference	19
2	Detailed Overview of Soil-Water Relationship	22
2.1	Introduction	22
2.2	Soil	23
2.2.1	Soil Formation	24
2.2.2	Soil Profile	25
2.2.3	Different Horizons of Soil	25
2.2.4	Soil and Irrigation	26
2.3	Water	26
2.3.1	Water Cycle	27
2.3.2	Life under the Water	28
2.3.3	Water Pollution	29
2.3.4	Water and Irrigation	30
2.4	Soil and Water Relationship with respect to Irrigation	31
2.4.1	Soil and Water System	32
2.4.2	Soil Classification	32
2.4.3	Soil Water Classification	34
2.4.4	Soil Water Contents	35
2.5	Importance of Water and Soil in Plant Growth	37
2.6	How the Plants absorb water from the Soil	38
2.7	Negative Relation - Soil Erosion	38
2.8	Key pointers of the chapter:	39
2.9	FAQs	39
2.10	References	41
3	Brief About Plant-water Relationship	43
3.1	Active Absorption	45
3.1.1	Active Osmotic Water Absorption:	45

3.1.2	Active Non-osmotic Water Absorption:	46
3.2	Passive Absorption	46
3.3	Transpiration	47
3.3.1	Evaporative Cooling:	48
3.3.2	Accessing Nutrients from the Soil:	48
3.3.3	Carbon Dioxide:	49
3.3.4	Water Movements	50
3.3.5	Water Uptake	50
3.3.6	Driving Force	50
3.3.7	Resistance	51
3.4	Properties of water	51
3.4.1	Water Potential	52
3.4.2	Evaporation	53
3.4.3	Water Equilibrium	53
3.4.4	Diffusion	54
3.4.5	Solutes	56
3.4.6	Solute Potential	57
3.5	Osmosis	58
3.6	Plant and Water Relationship in Osmotic System	59
3.6.1	Permeability	59
3.6.2	Plasmolysis	59
3.7	Control of Transpiration	61
3.8	Movement of water and minerals in the Xylem	61
3.8.1	Xylem:	61
3.9	Cavitation	63
3.10	Transportation of Photosynthates in the Phloem	65
3.10.1	Translocation:	65
3.10.2	Apoplast, Trans-membrane and Symplast:	66
3.11	Environmental Conditions	67
3.11.1	Relative Humidity:	68
3.11.2	Temperature:	68
3.11.3	Soil Water:	68
3.11.4	Light:	68
3.11.5	Wind:	69
3.12	Reference	69
4	Water Requirements of Crops and Irrigation Rate	71
4.1	Factors affecting the Water Requirement	72

4.1.1	Effect of Climate	72
4.1.2	Type of Crop	72
4.1.3	Groundwater Level	73
4.1.4	Intensity of irrigation	73
4.1.5	Type of Soil	73
4.1.6	Methods of Plowing and Water Application	73
4.1.7	Crop Period	73
4.2	Determination of Crop Water Requirement	73
4.2.1	Reference Crop Evapotranspiration (ET _o):	75
4.2.2	Crop Coefficient (K _c) and Crop Evapotranspiration (ET _{crop})	75
4.2.3	Factors affecting ET _{crop} in Local Conditions	75
4.3	Calculation of Reference Crop Evapotranspiration	76
4.3.1	Blaney-Criddle Method	76
4.3.2	Radiation Method	78
4.3.3	Penman Method	80
4.3.4	Pan Evaporation Method	82
4.4	Calculation of Crop Coefficient and Crop Evapotranspiration	84
4.5	Factors affecting Crop Evapotranspiration	85
4.5.1	Climatic Conditions	85
4.5.2	Soil Water	86
4.5.3	Irrigation Method	87
4.5.4	Agricultural Practices	88
4.6	Irrigation Rates	89
4.7	References	91
5	Soil Salinity and Quality of Water	94
5.1	Water Quality for Agriculture	94
5.1.1	Filters	96
5.1.2	pH and Alkalinity	96
5.1.3	Guidelines for Irrigation Water Alkalinity	98
5.1.4	Problems due to High Alkalinity and pH	98
5.1.5	Trace Minerals and Micronutrients	99
5.1.6	Rectifying the Water Quality Problem	99
5.2	Salinity	101
5.2.1	Salinity Problems	104
5.2.2	Management of the Salinity Problems	107
5.3	Reference	113

6	Hydraulics of Open Channels	116
6.1	Channel	117
6.2	Open-Channel flow	118
6.2.1	Types of the Open Channel	120
6.3	Measurements of the Velocity	123
6.3.1	Discharge Measurements:	124
6.4	Manning Equation	125
6.5	Critical Flow Condition in Open Channel Hydraulics	126
6.6	Fundamental Types of open-channel Hydraulics	126
6.7	Space Criteria	126
6.8	States of Flow	127
6.9	History of the Open Channels Hydraulics	127
6.9.1	Greek Age:	127
6.9.2	Persia:	128
6.9.3	China:	128
6.9.4	Sri Lanka:	128
6.9.5	Rome:	128
6.10	Free Surface Flow Classification	128
6.11	Hydrostatic Pressure Distribution	130
6.12	Best Hydraulic Section	132
6.13	Energy concept in Steady Uniform Flow	132
6.14	Hydraulic Jump and Hydraulic Drop Theory	133
6.15	Reference	134
7	Measuring the Channel Flow	137
7.1	Channel Flow Measurement	137
7.2	Traditional Methods	139
7.3	Disadvantages of these Traditional Methods	139
7.4	Various Methods to Measure Channel Flow	139
7.4.1	Timed Gravimetric	140
7.4.2	Tracer-Dilution	140
7.4.3	Area Velocity Method	141
7.4.4	Manning Equation	144
7.4.5	Hydraulic Structures	145
7.5	Channel Flow Meter Problems	146
7.5.1	Discharge	147
7.5.2	Methods	148
7.6	Reference	153

8	Detailed Overview of Pipe Flow	155
8.1	Overview of Pipe Flow	155
8.2	Introduction	156
8.3	Laminar and Turbulent Flows	157
8.3.1	Reynolds Number	158
8.4	Velocity Boundary Layer	159
8.4.1	Entry Lengths	160
8.5	Pressure Drop or Head Loss	161
8.6	Turbulent Flow Through Pipes	162
8.7	Turbulent Velocity Profile	164
8.8	Overview from Moody's Chart	166
8.9	References	167
9	Brief About Sprinkler Irrigation	169
9.1	Sprinkler Irrigation System	171
9.2	History of Sprinkler Irrigation System	172
9.3	Areas Where Sprinkler Irrigation Systems are mainly used	173
9.3.1	Agricultural Fields	174
9.3.2	Industrial Areas	174
9.3.3	Residential Places	174
9.4	Components of an irrigation system	176
9.5	Operating of Sprinkler Irrigation System	176
9.6	Underground Water Sprinkler	178
9.6.1	Things to Consider for Underground Sprinkler	179
9.7	Micro-Sprinkler Irrigation System	180
9.8	Modern Sprinkler	180
9.9	Modern Technology and Sprinkler Irrigation System	180
9.9.1	Moisture Sensing Technology	182
9.9.2	Smart irrigation Controllers	183
9.9.3	Rotating Sprinkler Nozzles	183
9.9.4	Rain Sensors	184
9.10	Advantages of a sprinkler irrigation system	184
9.11	Disadvantages of using Sprinkler irrigation system	185
9.12	References	186
10	A Brief About Drip Irrigation System	189
10.1	Introduction to Drip Irrigation System	190
10.2	Major Components of Drip Irrigation System	192

10.2.1	Pump Station	192
10.2.2	Control Valves	192
10.2.3	Filtration System	192
10.2.4	Mainlines, Sublines, and Laterals	193
10.2.5	5. Drippers or Drip Emitters	193
10.3	History of Drip Irrigation System	193
10.4	Working of Drip Irrigation System and its Various Components	194
10.4.1	Pumps or Pressurized Water Source	194
10.4.2	Water Filters or Filtration System	194
10.4.3	Backwash Controller or Backflow Prevention Device	195
10.4.4	Pressure Control Valve or Pressure Regulator	195
10.4.5	Distribution Lines or Sub Main Line Network	195
10.4.6	Control Valves and Safety Valves	195
10.4.7	Laterals	196
10.4.8	Emitters or Drippers	196
10.5	Types of Drip Irrigation System	197
10.5.1	Surface Drip Irrigation System	197
10.5.2	Subsurface Drip Irrigation System	198
10.6	Guidelines for Maintaining Drip Irrigation System	199
10.6.1	General Care	199
10.6.2	Regular cleaning of Filters	199
10.6.3	Chemical Treatment	200
10.7	Advantages of Drip Irrigation System	200
10.8	Disadvantages of Drip Irrigation System	202
10.9	Summary	203
10.10	Key Points to Remember	204
10.11	References	205
11	A Brief About Pumps and Pumping in Irrigation System	208
11.1	Pumping System	209
11.2	Objectives of Pumps	209
11.3	Pumping System Components	209
11.4	Characteristics of Pumping System	210
11.4.1	Static Head	210
11.4.2	Friction Head	211
11.4.3	Pump Performance Curve	212
11.4.4	Pump Operating Point	212

11.4.5	Pump Suction Performance	212
11.5	Classification of Pumps	214
11.5.1	Positive Displacement Pumps	214
11.5.2	Centrifugal Pumps	214
11.5.3	Progressive Cavity	215
11.5.4	Electric Submersible	215
11.6	Best Uses for Centrifugal Pumps	215
11.7	General Applications for Centrifugal Pumps	216
11.8	Applications of Pumps	217
11.8.1	Priming a Pump	217
11.8.2	Pumps as Public Water Supplies	217
11.8.3	Sealing Multiphase Pumping Applications	218
11.9	The Pumps Assessment	219
11.9.1	By which way to Calculate the Performance of a Pump?	219
11.9.2	Problems in the Assessment of Pumps	219
11.10	Pumping Stations	220
11.11	Basic design principles	221
11.12	Save Energy Through Pumping System	221
11.12.1	Choose the Most Effective Pump model for the Application	222
11.13	Pump Systems for current Agricultural Irrigation	225
11.14	A brief about Irrigation	226
11.15	What to Recognize While Providing Water to the Crop?	227
11.16	Traditional Strategies and Pumping Clarifications	228
11.17	References	228

12 A Brief about Gravity Irrigation 231

12.1	Components of Gravity-Fed Irrigation System	232
12.1.1	Water Reservoir	232
12.1.2	Support Structure	233
12.1.3	Piping	233
12.1.4	Timer and Filter	233
12.1.5	Valves and Drips	233
12.2	Gravity Flow Irrigation Method	233
12.3	Construction of Gravity Flow Irrigation System	235
12.4	Reference	239

13 Overview of Land Grading	243
13.1 Introduction	243
13.2 Planning Considerations	246
13.2.1 Cuts, Fills and Slopes	246
13.2.2 Exposed Surfaces	247
13.2.3 Areas of Construction and Erosion	247
13.2.4 Surveys	248
13.3 Design Recommendations	248
13.4 Construction	251
13.5 Land Grading Methods	252
13.5.1 The Plane Method	252
13.5.2 The Profile Method	254
13.6 Tools and Techniques	255
13.7 Operation and Maintenance	256
13.8 References	256
14 Everything Related to Drainage of Irrigated Field	260
14.1 Components of Drainage System and Need for Drainage	262
14.1.1 Field Drainage System	265
14.1.2 Main Drainage System	266
14.1.3 Outlet	267
14.2 Surface Drainage	267
14.2.1 Ditches or Open Drains	268
14.2.2 Grassed Waterways	269
14.2.3 Humps and Hollow	270
14.2.4 Levees or Graded Banks	271
14.2.5 Laser Leveling or Grading	272
14.3 Subsurface Drainage	273
14.3.1 Subsurface Pipes	274
14.3.2 Mole Drainage	275
14.3.3 Interceptor Drains	276
14.3.4 Ground Water Pumps	276
14.4 Reference	276
15 Factors and Aspects to Consider Before Choosing the Irrigation Method	278
15.1 Various Irrigation Methods to Choose from	281
15.2 Factors to Consider While Selecting the Method	281

15.2.1	Sprinkler, Drip or Sprinkle Irrigation	282
15.2.2	Furrow, Basin or Border Irrigation	287
15.3	References	290
16	Health Hazards of Irrigation	292
16.1	Environmental Impact of Irrigation	293
16.2	Health Impact of Irrigation	294
16.3	Diseases and Infections Caused by Pathogens – Waterborne Disease	297
16.3.1	Protozoa	297
16.3.2	Bacteria	298
16.3.3	Virus	299
16.3.4	Algae	300
16.3.5	Parasitic Worms	300
16.4	Deadliest Diseases Caused by Contaminated Irrigation Water	300
16.4.1	Japanese Encephalitis	300
16.4.2	Schistosomiasis	301
16.4.3	Malaria	302
16.5	Health Impact Caused Due to The Utilization of Pesticides	304
16.6	References	306
17	Economics and Costing Related To Irrigation	309
17.1	Introduction	309
17.2	Economic Characteristics of Irrigation	310
17.3	Operational Economics of Irrigation Systems	311
17.4	Tariff and Price Policies	312
17.5	Economics of reconstruction rebuilding and framing of Irrigation System	314
17.6	Costing if Irrigation and Water Prices	314
17.6.1	State Considerations	314
17.7	Components of Costing	316
17.8	Water Prices and Policies	317
17.9	Water Cost and Policies of Repayment in American West	318
17.10	References	321
18	A Brief About Computerized Automated Irrigation	324
18.1	What is Computerized Automated Irrigation?	324
18.2	Need for Automation	325

18.2.1	Intensive Labor:	325
18.2.2	Required Time:	325
18.2.3	Irrigation Efficiency:	325
18.2.4	Water Wastage:	325
18.2.5	Leaching:	325
18.2.6	Requires Vigilance:	325
18.3	Classification of Computerized Irrigation Systems	326
18.3.1	Time-based Irrigation System:	326
18.3.2	Volume-based Irrigation System:	326
18.3.3	Closed-loop Irrigation System:	326
18.3.4	Real-time Feedback System:	327
18.3.5	Open-loop System:	327
18.3.6	Computerized automated System:	327
18.4	Components of Computerized Automation System	327
18.4.1	Power Supply:	328
18.4.2	Micro-controller:	329
18.4.3	GSM Module and Mobile:	335
18.5	Working of Computerized Irrigation Systems	336
18.6	Advantages and Disadvantages of computerized Irrigation Systems	336
18.6.1	Advantages:	336
18.6.2	Disadvantages:	336
18.7	References	337
19	Irrigation Management and Scheduling	339
19.1	Irrigation Management	339
19.2	Water Management	340
19.2.1	Communal Water Management	340
19.2.2	Enterprise Water Management	341
19.2.3	Utility Water Management	341
19.3	Technologies used for Water Application	342
19.4	Irrigation Scheduling	343
19.5	Factors to Consider for Scheduling	343
19.5.1	Moisture Content	343
19.5.2	Depth of the Root Zone	344
19.5.3	Water Holding Capability	344
19.5.4	Effective irrigation	345
19.5.5	Water usage	345

19.6	Irrigation Scheduling Techniques	345
19.6.1	Evapotranspiration Scheduling (ETS)	345
19.6.2	Irrigation scheduling as per irrigation systems	350
19.6.3	Soil Moisture Monitoring	353
19.6.4	Plant-based Irrigation Scheduling	353
19.7	References	354
20	Everything about Cotton Irrigation	359
20.1	What is Irrigation?	359
20.1.1	Necessity of a Water System	360
20.2	How to Choose an Irrigation Framework?	361
20.3	Irrigation Scheduling for Cotton	361
20.4	Evapotranspiration	362
20.5	Need of Cotton Irrigation	364
20.6	Water Use for Cotton Irrigation	364
20.7	Cotton Production	365
20.8	Well-arranged and Well-executed Cotton Harvest	365
20.8.1	Cotton-Harvest-Systems	365
20.8.2	Lint Quality	366
20.8.3	Foundation of Stripper Harvesting	366
20.8.4	Foundation of Cotton Harvesting	366
20.8.5	Sledding	366
20.8.6	First Cotton Flowers to Bloom	367
20.8.7	Pinnacle Bloom to Open Balls	367
20.8.8	A well-executed and a Well-planned Cotton Harvest	368
20.9	References	368
21	Cultivation of Sugar Crops	371
21.1	Introduction	371
21.2	Sugar Crops Water Requirement	372
21.2.1	Water Requirement based on the Phases of Growth	373
21.2.2	Water Requirements based on seasons and Soil Textures	374
21.3	Methods of Sugarcane Irrigation	375
21.3.1	Furrow irrigation	375
21.3.2	Alternate Furrow irrigation	376
21.3.3	Flood irrigation	376
21.3.4	Micro irrigation	376

21.3.5	Sprinkler Method of irrigation	377
21.4	Drip Irrigation	377
21.4.1	Types of Drip Irrigation	378
21.4.2	How is drip irrigation better than furrow or Sprinkler Method?	379
21.4.3	Drip irrigation System Structure	380
21.5	Fertigation	383
21.5.1	Advantages of Fertigation over Conventional Methods of Application	383
21.5.2	Functions of Nutrients	384
21.5.3	Adequate fertigation in Different Stages	385
21.6	References	385
22	Everything About Oil Crops Irrigation	389
22.1	Introduction	389

23	Everything about Cereal Crops Irrigation	405
23.1	List of main Cereal Crops	406
23.1.1	Rice (mainly <i>Oryza sativa</i>)	406
23.1.2	Wheat, Bread Wheat (<i>Triticum aestivum</i>)	406
23.2	Pseudo Cereals Crops	406
23.3	Main Crops in India	407
23.3.1	Rabi Crops (Arabic term for spring)	407
23.3.2	Kharif Crops (Arabic term for autumn)	407
23.3.3	Zaid Crops (Arabic term for summer)	407
23.4	Factors Affecting Cereal Crops Irrigation	407
23.4.1	Climatic Factors	408
23.4.2	Crop Type and Crop Period	408
23.4.3	Water Table	408
23.4.4	Ground Slope	408
23.4.5	Intensity of Irrigation	409
23.4.6	Conveyance Losses	409

23.4.7	Methods of Application of Water	409
23.4.8	Methods of Plowing	409
23.4.9	Base Period	410
23.4.10	Delta of Crop	410
23.5	Yield potential of irrigated cereals	410
23.6	Irrigation requirements at different stages of growth	410
23.7	Check method irrigation of cereal crops	411
23.8	Current situation of cereal crop irrigation	411
23.9	References	411
24	Detailed Overview of Irrigating Alfalfa	414
24.1	Irrigating Alfalfa	415
24.2	Methods of Irrigation	415
24.2.1	Flood Irrigation:	416
24.2.2	Center Pivot Irrigation:	416
24.2.3	Subsurface Drip Irrigation:	416
24.3	Biological features of Alfalfa in a drought	416
24.3.1	High Water Use	416
24.3.2	Root Characteristics	417
24.4	Irrigation Scheduling	420
24.5	Strategies for Irrigating Alfalfa	421
24.6	Common system for Alfalfa Irrigation	423
24.6.1	SDI in Alfalfa	424
24.7	Drip Irrigation's Benefits and Limitations for Alfalfa	428
24.8	Keys to powerful Alfalfa Irrigation	430
24.9	References	431
25	Detailed Overview of Citrus Irrigation	435
25.1	What is Citrus?	435
25.2	Irrigation of Citrus	436
25.3	Tips while irrigating Citrus	437
25.4	Warning related to Overwatering Citrus	437
25.5	Agronomic Characteristics of Citrus	437
25.6	Water Management for Citrus Orchards	438
25.7	Methods of Irrigation	440
25.7.1	Gravity Irrigation	441
25.7.2	Sprinkler Irrigation	441
25.7.3	Micro Irrigation	441

25.8	Several Final Points Regarding Irrigation	443
25.9	Water Necessities at Every Developing Stage	443
25.9.1	Fruit Set, Flowering and Development of New Flush	443
25.9.2	Fruit Development	444
25.9.3	Fruit Maturing Platform	444
25.9.4	After a Collection of Fruit	444
25.9.5	Manage Citrus Crop and Size with Accurate Irrigation	444
25.9.6	The challenge for citrus farmers	444
25.9.7	Controlled Plant Growth and Size of Fruit	445
25.9.8	Controlled Inputs	445
25.9.9	Effective Administration at all periods	445
25.9.10	Better Disease Control	445
25.9.11	Effective Bahar Management	445
25.10	References	446
