

Table of Contents

1	Smart Cities and Connected Intelligence	1
1.1	Platforms, Smart Ecosystems and Connected Intelligence	1
1.2	What care has to be taken while Developing a Smart Ecosystem?	2
1.3	What are the changes can be brought about by the Platform given by a Smart City?	3
1.4	Are Smart Cities really needed?	4
1.5	How does IoT help in this?	6
1.6	How to build a successful Smart City?	7
1.7	Smart Cities and Connected Intelligence	8
1.8	How did the Digital Technology and Innovations Help Connectivity?	9
1.9	How to Transform Traditional Cities into Smart Cities?	11
1.10	Benefits of the use of Technologies in Smart Cities	13

1.10.1	Security	14
1.10.2	Water Management	15
1.10.3	Increasing Traffic Awareness in the City	16
1.10.4	Transport Services	18
1.11	Benefits of Connected Intelligence in a Smart City	20
1.11.1	Data-driven Decisions	20
1.11.2	Improved Engagement	21
1.11.3	Benefits to the Environment	21
1.11.4	Healthcare Services	22
1.11.5	Increased Digitalization	23
1.11.6	Improved Efficiency of Public Services and Utilities	24
1.11.7	Enhanced Infrastructure	24
1.11.8	Reducing Labor Intensive Tasks	25
1.11.9	Maintaining Environmental Balance	25
1.12	Impact of IoT in the Smart City Ecosystem	27
2	Connected Intelligence and Great Challenges of the 21st Century	29
2.1	What is Connected Intelligence?	30
2.2	Challenges posed by the 21 st century	30
2.3	Artificial Intelligence	31
2.4	Complexity	32
2.5	Lack of Direct Communication	33
2.6	Data Integrity	33
2.7	Digital Transformation	34
2.8	Budget	34
2.9	Impact of Connected Intelligence in Smart Cities	36
2.9.1	Awareness Spaces	37
2.9.2	Engagement Spaces	39
2.9.3	Shared Spaces	42
2.10	Connected Intelligent Spaces	44
2.10.1	Impact of Connected Technologies in a Smart City	45
2.10.2	Identifying Garbage Disposal Times	46
2.10.3	Identifying Convenient Route	47
2.10.4	Exploring the Shortcomings of the Smart Cities Using Connected Intelligence and Technologies	49

2.10.5	Educating People and Engaging them	49
2.10.6	Infrastructural Changes	51
2.10.7	Power	52
2.10.8	Privacy and Data Security	53
2.10.9	Biased Data	53
2.11	Challenges and Opportunities	55
2.11.1	Population	55
2.11.2	Resources	56
2.11.3	What is Sustainable Development?	56
2.11.4	How to Implement Sustainable Development Strategies in the Context of Smart Development?	57
2.11.5	Reforestation	57
2.11.6	Transport Services	58
3	Smart Cities are Cyber-Physical Systems of Innovation	59
3.1	What is a Cyber-physical System?	60
3.1.1	CPSs in Manufacturing	61
3.1.2	CPSs in Healthcare	61
3.1.3	CPSs in Transportation Environment	62
3.1.4	CPSs in Agricultural Environment	62
3.1.5	CPSs in Computer Environment	63
3.2	How smart cities can be looked upon as cyber-physical systems?	64
3.3	Some Challenges that a smart city can face while working as a CPS	65
3.3.1	Reliability	66
3.3.2	Data Management	66
3.3.3	Privacy	66
3.3.4	Security	67
3.4	What we need to learn from this?	67
3.5	CPSs for the Development of Smart Cities	67
3.6	Challenges in Implementing CPS in Smart Cities	72
3.7	Security Issues in Cyber Physical Systems	72
3.8	Structural issues in the design of cyber physical systems:	74
3.8.1	Sensors	74
3.8.2	Actuators	75
3.8.3	Monitoring Devices	75

3.9	How to Ensure Safety and security of the Physical Devices?	76
3.9.1	Authentication Process	76
3.9.2	Cross Verification	77
3.9.3	Threat Analyzers	77
3.10	Limitations of the Security Programs	77
3.10.1	Time Constraints	78
3.10.2	Re-configuration	78
3.11	Solutions to Avoid Security Issues in the Cyber Physical Systems	79
3.12	Use of Digital Technologies	79
3.13	Advantages of CPS	80
3.13.1	Interaction Between Man and System	80
3.13.2	Flexibility	80
3.13.3	Dealing with Environment and other Uncertainties	81
3.13.4	Improvement in Performance	81
3.13.5	Scalable	82
3.13.6	Fast	82
3.14	Applications of CPS	82
3.14.1	Developing Green Buildings	83
3.14.2	Education	83
3.14.3	Structural Monitoring	84
3.14.4	Aeronautic Systems	84
3.14.5	Transport Systems	84
3.14.6	Robots	85
3.14.7	Medical Applications	85
3.14.8	Smart Grids	86
3.15	Disadvantages of CPS	86
3.15.1	Security issues	87
3.15.2	Costly	88
3.15.3	Disruption of the Infrastructure	88
3.15.4	Cyber Attacks	89
3.16	Internet of Things and CPS in smart city	89
3.17	Difference between IoT and CPS	90
4	Effectiveness of Smart City Solutions	93
4.17.1	Parking Solutions	94

4.17.2	Healthcare Solutions	94
4.17.3	Lighting Solutions	95
4.17.4	Data Management Solutions	96
4.17.5	E-governance Solutions	96
4.1	Building Effective Smart City Models	97
4.2	Implementation of Innovative Solutions in the Smart Cities	98
4.2.1	Top-down Approach	102
4.2.2	Comparison	102
4.2.3	Data Modeling	102
4.2.4	Training	103
4.2.5	Inclusion of People	103
4.3	Smart Cities and Connected Communities	103
4.4	Smart Cities of the Future	107
4.5	Smart Buildings	108
4.6	Smart Citizens	111
4.7	Challenges that a Smart City can face while Implementing Smart City Solutions	113
4.7.1	Infrastructural Issues	113
4.7.2	Security Issues	114
4.7.3	Privacy Issues	115
4.7.4	Engagement Issues	116
4.7.5	Social Inclusion	116
4.8	Effectiveness of Smart City Solutions	116
4.8.1	Collaboration	118
4.8.2	Standard Technology	119
4.8.3	Cyber Issues	119
4.8.4	Procurement of Funds	120
4.9	How to connect with the Local Communities of a city?	122
4.10	Who all can be a part of a Smart City Project?	122
4.11	How can Cities Develop Smart City Models without an Upfront Investment?	123
4.12	Smart Ecosystems and layers of Connected Intelligence	124
4.13	Connection of Technology and Smart Ecosystems	125
4.14	Framework of a Smart Ecosystem	126
4.15	Value Creators	127
4.15.1	Value Layers	128
4.15.2	Innovation Layer	128

4.15.3	Operations Layer	129
4.15.4	Financing Layers	129
4.15.5	Information Layer	129
4.15.6	Security Layer	129
4.15.7	Infrastructure Layer	129
4.16	Rise of Connected Cities	130
4.17	What is Connected Intelligence?	131
4.18	Why AI (Artificial Intelligence) layer is implemented in IoT?	133
4.19	Building a Smart Ecosystem in the age of connected Intelligence	136
4.20	Connecting Transport and Traffic Services	138
4.20.1	Security	140
4.20.2	Mobility Management	140
4.20.3	Creating a Solid Infrastructure	141
4.21	Age of Distraction and its connection with a Smart World	141
4.21.1	What is the age of Distraction?	142
4.21.2	What can be done to avoid the issue of Distraction?	143
4.22	Connected Intelligence and Sustainable Cities	147
4.22.1	Data Management	148
4.22.2	Enhancing Agricultural Production	149
4.22.3	Pollution created by Vehicles	150
4.22.4	Managing E-waste	151
5	Smart Growth: Externality Platforms and Disruptive Innovation	155
5.1	How do the Disruptive Technologies or Innovation make Cities more Livable?	156
5.2	Externalities & Smart Growth	157
5.3	What does Smart Growth Really Mean?	158
5.4	Connecting Innovation and Digital Worlds	159
5.4.1	How can Innovation and Digital Worlds be Connected Together?	160
5.5	Innovations using Digital Technology	161
5.6	Real challenge in Connecting Innovation and Digital Worlds	162

5.7	Connecting Innovation and Digital Technology in Different Environments	163
5.8	Transforming Ecosystem in the Digital Era	165
5.9	Bridging the gap between Innovation and Digital Technology	167
5.10	Engagement	169
5.11	Revolutionary ideas that could initiate the process of Smart Growth in Cities	171
5.11.1	Smart Transport and Electric Vehicles	171
5.11.2	Digital administration	173
5.12	Controlling Energy Consumption	175
5.12.1	Smart Healthcare Ideas	176
5.12.2	Smart Data Analytics	177
5.12.3	Smart Education	178
5.13	Impact of Smart Growth on the Workplace Trends	179
5.13.1	Using Personal Devices	180
5.13.2	Employee Satisfaction	180
5.13.3	Improving Cyber-security	181
5.14	Why is Disruptive Innovation Necessary?	182
6	Externality Platforms, Disruptive Innovation and Smart Growth	186
6.1	Why is study of Externalities Essential while planning a Smart City?	187
6.2	Economical Externality	188
6.3	Environmental Externality	189
6.4	Disruptive Innovation and its impact on growth of Smart Cities	190
6.5	Role of Partnerships in Implementing Disruptive Technologies	191
6.6	What is Creative Destruction?	192
6.7	What is a Disruptive Technology?	193
6.7.1	Rise of Artificial Intelligence	195
6.7.2	Self Driven Cars	196
6.7.3	Medical Technologies	196
6.7.4	Megapolis	197
6.7.5	Skype Translator	198
6.8	How to manage and Implement Disruptive Innovation?	198

6.8.1	Leadership Skills	199
6.8.2	Data Integration	200
6.8.3	Planning	201
6.9	Fundamentals of Disruptive Technologies	201
6.10	Is Disruptive Innovation Sustainable?	207
6.11	Challenges to Disruptive Innovations	209
6.12	How to Interpret Disruptive Innovation in the concept of Smart Cities?	212
6.12.1	Demographic Challenges	213
6.12.2	Technological Revolution	213

7 Safety and Security: Engagement Platforms and Social Innovation 216

7.1	Social Innovation in Smart Cities and Ecosystems	217
7.1.1	What is Social Innovation?	217
7.1.2	Connectivity	218
7.1.3	Data Integrity	219
7.2	Disruptive Technology and Security	219
7.3	Citizen Engagement & Social Innovation	220
7.4	People can be engaged through the following ways:	221
7.5	Why is Engagement Necessary for Social Innovation?	222
7.5.1	Understanding Social Issues and Needs	223
7.5.2	Innovative Ideas	223
7.5.3	Diverse Thinking	224
7.5.4	Changing Scenarios	224
7.6	Digital Social Innovation	225
7.6.1	Innovation	225
7.6.2	Social & Environment Issues	226
7.6.3	Digital Technologies	226
7.7	Examples of Digital Social Innovations	227
7.7.1	Fairphone	228
7.7.2	Opendsk	229
7.8	Need of Social Innovation in Smart Cities	229
7.9	How can a Social Innovation Project be feasible for Common People or Citizens?	230
7.9.1	What is Crowd Funding?	231
7.9.2	Leaderships and Strategy	232
7.10	A Smart City Ecosystem as an Innovation Model	233

7.11	Case study	235
7.12	What is Innovation in Tourism?	236
7.13	The Smart City Ecosystem of Montreal	237
7.14	Points of Discussion	239
7.15	Social Innovations in Smart Cities	241
7.16	Let us see some models of socially smart cities:	245
7.17	Owned City Model	246
7.18	Creative City	247
7.19	Resilient City	248
8	Cyber-Physical Spaces for Engagement, Social Innovation and Safe Cities	250
8.1	Cyber-physical Social Space for Engagement	252
8.2	Social innovation and cyber-physical space	254
8.3	Building City Intelligence	256
8.4	Relation Between Social Innovation and safety of Smart Cities	257
8.5	How can the Digital Technologies be used to make Smart Cities a Better Place?	259
	8.5.1 Communication Technologies	260
8.6	IoT	261
8.7	Sensors	262
8.8	AI	262
8.9	Blockchain Technology	263
8.10	Geospatial Technology	265
8.11	How to make a smart city safe and secure with the help of Evolving Technologies?	266
	8.11.1 Communications Network	267
	8.11.2 Security	268
	8.11.3 Intelligent Solutions	270
8.12	Importance of Data Analytics in Securing Premises of a city	272
8.13	Funding	273
8.14	Safe Cities in the Future	274
8.15	Direct Public Services and systems that can make city life a lot safer	276
	8.15.1 Free WIFI connection	276
	8.15.2 Centralized Operations	276

9 Sustainability: Awareness Platforms and Eco-Innovation	278
9.1 Sustainable Development Goals	279
9.2 Utilising the concept of IoT to develop Smart Cities	281
9.2.1 Empowering People	282
9.3 Sustainability Initiatives by Cities	282
9.4 Environmental Sustainability under the 'Smart Everything' Paradigm	284
9.5 Urban Development	285
9.6 Smart and Sustainable Cities	287
9.7 Eco-innovations in Smart Cities	291
9.7.1 Eco-friendly	292
9.7.2 Better Land use	293
9.7.3 Restoration	293
9.7.4 Transport Issues	295
9.7.5 Energy Efficiency	295
9.7.6 Improvement in Lives	296
9.8 Eco-innovations and Economic Growth	297
9.9 Ecological Awareness	297
9.10 CAPS	298
9.11 Challenges of Sustainable Development	299
9.11.1 Complexity	300
9.11.2 Governance	300
9.11.3 Unemployment	300
9.11.4 Expenditure	300
9.11.5 Time Constraints	301
9.11.6 Economy	301
9.11.7 Saving the Planet	302
9.11.8 Healthier Environment	302
9.12 Advantages of Eco-Innovation	303
9.12.1 Clean Image	304
9.12.2 Better usage of natural resources	305
9.12.3 Business Profits	305
9.12.4 Boost for Tourism	306
9.13 Eco-design	307
9.14 Conclusion	308
9.14.1 What is an Ideal Smart City?	309

9.15	Relation Between Smart Cities and Sustainability	312
9.15.1	Pollution	313
9.15.2	Depletion of Energy Resources	314
9.15.3	Well-being	315
9.15.4	Tourism	315
9.15.5	Cost	316
9.15.6	Focussed on Business	316
9.16	How can Smart City Infrastructure be used for Sustainable Development?	318
9.17	Using Technology for Overall Development	321
9.18	How to build trust among the Citizens?	322
9.19	Top Smart Cities of the world	324
9.20	Tokyo	324
9.21	London	325
9.22	New York	325
9.23	Zurich	326
9.24	Paris	327
9.25	Some key features of the Future Sustainable Cities	327
9.25.1	Finance	328
9.25.2	Networking & Training	329
9.25.3	Transport	329
9.25.4	Building Hubs	330
9.25.5	Eco-friendly Vehicles	330
9.25.6	Public Engagement and Collaboration	331
9.25.7	Smart Buildings	331
9.25.8	Bringing Cities Closer	332
9.25.9	Safer Cities	332
9.25.10	Energy	332
9.25.11	Food	333
9.26	Eco-innovations and Sustainability	334
10	Appendix	336
10.1	Appendix A	336
10.2	Appendix B	337
	Index	338
